PROFESSIONAL SUMMARY

Results-driven and highly motivated Research Engineer with a proven track record of delivering cutting-edge solutions through data-driven decision making and cross-functional collaboration. Passionate about leveraging innovative technologies to spearhead mission-critical projects and champion organisational objectives. Committed to synergistically integrating actionable insights to unlock dynamic value creation and drive measurable impact across technical domains.

WORK EXPERIENCE

Research Engineer

TechVision Research Ltd

Oxford, United Kingdom

www.techvision.io

June 2023 - Present

Developed and implemented machine learning algorithms for natural language processing tasks, achieving a 15% improvement in model accuracy compared to baseline approaches. Collaborated with senior researchers to design experimental protocols for evaluating novel deep learning architectures on benchmark datasets. Contributed to the preparation of technical documentation and research papers, presenting findings at internal seminars to cross-functional teams. Assisted in optimizing computational pipelines using Python and PyTorch, reducing training time by approximately 20% through vectorization and parallel processing techniques.

Junior Data Scientist

Quantum Insights Analytics

London, United Kingdom

www.quantuminsights.co

February 2023 - May 2023

Conducted exploratory data analysis on large-scale datasets containing over 50 million records using SQL and Pandas to identify patterns and anomalies. Built predictive models using scikit-learn and statistical methods to forecast customer churn, achieving 87% precision on validation sets. Participated in agile development sprints and contributed to cross-team meetings regarding data pipeline improvements and feature engineering strategies. Automated routine data preprocessing tasks using Python scripts, reducing manual processing time by 8 hours per week and enabling team members to focus on higher-value analytical work.

Data Engineering Intern

CloudBase Systems

Reading, United Kingdom

www.cloudbases.net

September 2022 - January 2023

Assisted in designing and implementing ETL pipelines for ingesting data from multiple APIs into cloud-based data warehouses using Apache Airflow. Wrote SQL queries to extract, transform, and validate data for reporting dashboards used by product and business intelligence teams. Collaborated with senior engineers to troubleshoot data quality issues and implement automated data validation checks to ensure consistency. Documented data

schemas and pipeline architecture, creating comprehensive technical guides to facilitate knowledge sharing across the engineering team.

EDUCATION

Bachelor of Science in Computer Science

University of Oxford

Oxford, United Kingdom

Graduated: June 2022

Final Grade: 2:1 (Upper Second-Class Honours)

Relevant coursework: Machine Learning, Data Structures and Algorithms, Database Systems, Artificial Intelligence, Software Engineering, Statistics and Probability

TECHNICAL SKILLS

Programming Languages: Python, SQL, Java, JavaScript

Data Analysis and Visualization: Pandas, NumPy, Matplotlib, Seaborn, Tableau

Machine Learning: scikit-learn, TensorFlow, PyTorch, XGBoost

Database Technologies: PostgreSQL, MySQL, MongoDB, Apache Hadoop

Cloud Platforms: AWS (EC2, S3, RDS), Google Cloud Platform

Big Data Tools: Apache Spark, Apache Airflow, Kafka

Development Tools: Git, Docker, Linux, Jupyter Notebook, VS Code

Additional: Statistics, Experimental Design, API Development, Agile Methodologies

CERTIFICATIONS

Python for Data Analysis Certificate

DataCamp, 2023

Introduction to Machine Learning

Coursera, 2023
