PROFESSIONAL SUMMARY

I'm a BI Analyst with 5 years of experience building dashboards and reports that actually get used by stakeholders. I started in data support and worked my way into designing analytics solutions using SQL and Tableau. I'm methodical about data quality and get frustrated with dashboards that don't answer real business questions. I prefer working with teams that value transparency and push back on vague requirements.

WORK EXPERIENCE

Senior BI Analyst

DataViz Solutions Ltd

Manchester, United Kingdom

www.dataviz-solutions.io

January 2022 - Present

Designed and deployed 12 enterprise Tableau dashboards covering sales, finance, and operations for clients across retail and manufacturing sectors. Optimized SQL queries for ETL pipelines that reduced data refresh time from 4 hours to 45 minutes, serving 200+ end users daily. Mentored 2 junior analysts on data modelling principles and best practices for creating self-service analytics. Liaised with product managers to identify metrics gaps in existing reports and implemented 6 new KPI trackers that improved decision-making timelines by 3 weeks.

BI Analyst

Insight Analytics Group

Liverpool, United Kingdom

www.insightanalytics.co.uk

June 2020 - December 2021

Built 8 new Power BI reports from requirements gathering through production deployment, serving marketing and customer success teams with weekly performance metrics. Wrote complex DAX formulas and M queries to transform raw transactional data into actionable business intelligence across 3 separate data sources. Created data dictionary documentation and conducted 15+ training sessions for non-technical stakeholders on report functionality and drill-down capabilities. Implemented data validation rules in SQL that caught and prevented 23 duplicate records monthly in critical sales datasets.

Data Analyst

Northern Business Systems

Liverpool, United Kingdom

www.nbs-tech.net

August 2019 - May 2020

Extracted and cleaned data from legacy CRM systems using SQL Server, creating 5 standardized datasets used across finance and operations departments. Developed Excel-based reporting solutions with VBA macros that automated monthly consolidation of regional sales data, reducing manual work by 18 hours per month. Troubleshot

data inconsistencies in customer records and worked with IT to resolve integration issues affecting 3 upstream systems. Assisted senior analyst with dashboard maintenance and supported ad-hoc reporting requests averaging 8 queries per week.

EDUCATION

MSc Data Analytics

University of Manchester

Manchester, United Kingdom

Graduated: September 2019

BSc Business Information Technology

University of Leeds

Leeds, United Kingdom

Graduated: June 2017

TECHNICAL SKILLS

Databases: SQL Server, MySQL, PostgreSQL

BI Tools: Tableau, Power BI, Excel (VBA, advanced formulas)

ETL: SQL scripting, basic Python for data cleaning

Data Formats: CSV, JSON, XML

Version Control: Git, GitHub

Cloud Platforms: Basic AWS familiarity

Other: Data modelling, dimensional design, requirements gathering

GITHUB REPOSITORIES

mfletch88/tableau-dashboard-templates

Collection of reusable Tableau workbooks for common business metrics including sales funnels, cohort analysis, and financial dashboards with documentation.

mfletch88/sql-optimization-scripts

Repository of SQL query optimization examples and performance tuning techniques I've documented while working on production systems.

mfletch88/power-bi-dax-reference

Personal reference guide with 40+ DAX formulas and patterns for common business calculations, with examples and explanations.

mfletch88/data-cleaning-python

Python scripts for common ETL tasks including deduplication, null handling, and data validation using pandas and NumPy libraries.

CERTIFICATIONS

Tableau Desktop Specialist, Tableau Software, 2021

Google Analytics Individual Qualification, Google, 2020
