## PROFESSIONAL SUMMARY

Results-driven and highly motivated Staff Engineer with a proven track record of spearheading cutting-edge technical initiatives that deliver actionable insights and mission-critical solutions. Passionate about leveraging innovative technologies to champion cross-functional collaboration and drive synergistic outcomes across organisational objectives. Committed to data-driven decision making and passionate about delivering value through dynamic engineering excellence, with a demonstrated ability to translate complex technical challenges into strategic business impact whilst fostering a culture of continuous improvement and organisational transformation.

## WORK EXPERIENCE

Senior Software Engineer

TechVision Solutions

techvision.io

Bristol, United Kingdom

January 2022 - Present

Architected and deployed microservices infrastructure supporting 50+ mission-critical applications serving over 2 million daily active users, resulting in 40% improvement in system latency and 99.99% uptime across production environments

Directed and managed a cross-functional team of 35 engineers across backend, frontend, and DevOps disciplines, overseeing technical strategy, code quality standards, and delivery of enterprise-grade solutions

Led migration of legacy monolithic systems to cloud-native architecture on AWS, reducing infrastructure costs by 45% and enabling horizontal scaling capabilities for high-traffic workloads

Established comprehensive observability frameworks utilising Prometheus, Grafana, and ELK stack, providing real-time visibility into system performance and enabling proactive incident response protocols

Junior Software Developer

Innovate Digital Ltd

innovatedigital.co

Bath, United Kingdom

March 2020 - December 2021

Managed and mentored a team of 22 junior developers in Agile sprint cycles, establishing coding standards and best practices whilst delivering 150+ features across multiple product lines

Designed and implemented RESTful APIs handling 10 million requests daily, with meticulous attention to security protocols and data validation procedures across authentication layers

Spearheaded DevOps transformation initiative introducing containerisation with Docker and orchestration via Kubernetes, reducing deployment time by 65% and improving reliability metrics

Championed adoption of automated testing frameworks and CI/CD pipelines, increasing test coverage from 35% to 89% and detecting critical defects before production deployment

Graduate Software Engineer

DataFlow Systems

dataflow.net

Bristol, United Kingdom

July 2019 - February 2020

Promoted to Principal Technical Lead within six months, overseeing strategic direction of company-wide digital transformation affecting 500+ employees and multiple business units

Architected enterprise data pipeline processing 500GB of daily data through Python and Apache Spark, enabling data-driven insights for executive leadership and cross-organisational decision making

Implemented machine learning models for predictive analytics, achieving 92% accuracy in forecasting business metrics and supporting strategic planning initiatives

Collaborated synergistically with stakeholders across finance, operations, and marketing to translate business requirements into technical specifications and deliver mission-critical solutions

## EDUCATION

Bachelor of Science in Computer Science

University of Bristol

Bristol, United Kingdom

Graduated: June 2019

Grade: 2:1 (Upper Second Class Honours)

## TECHNICAL SKILLS

Programming Languages: Python, Java, Go, TypeScript, C++, SQL, JavaScript

Cloud Platforms: AWS, Azure, Google Cloud Platform, Docker, Kubernetes

Databases: PostgreSQL, MySQL, MongoDB, Redis, Elasticsearch

Message Queues: Apache Kafka, RabbitMQ, AWS SQS

DevOps Tools: Jenkins, GitLab CI/CD, Terraform, Ansible, CloudFormation

Monitoring and Observability: Prometheus, Grafana, ELK Stack, DataDog, New Relic

Frameworks: Spring Boot, FastAPI, Express.js, React, Django

Architecture Patterns: Microservices, Event-Driven Architecture, CQRS, Serverless

Version Control: Git, GitHub, GitLab

Agile Methodologies: Scrum, Kanban, SAFe
