PROFESSIONAL SUMMARY

I'm a junior data scientist with just over a year of hands-on experience in Python, SQL, and machine learning. I've worked on projects involving predictive modelling and data analysis for e-commerce and financial services. I'm genuinely interested in learning how statistical methods solve real business problems, and I'm looking for roles where I can grow my skills while contributing meaningfully to data-driven decisions.

WORK EXPERIENCE

Data Scientist

Insight Analytics Solutions

Previously known as DataVault Technologies

Birmingham, United Kingdom

June 2023 - Present

Developed and deployed a customer churn prediction model using logistic regression that identified at-risk accounts with 78% accuracy, directly supporting retention strategies for a 200-person SME client base

Built automated ETL pipelines in Python to clean and transform messy transactional data from 15 different sources, reducing manual reporting time by approximately 40 hours per month

Collaborated with the product team to design A/B tests for new recommendation features, analysing results using statistical hypothesis testing and presenting findings to stakeholders

Created interactive Tableau dashboards displaying KPIs for marketing campaigns, enabling the team to track performance across channels in real-time

Junior Data Analyst

Beacon Financial Services Ltd

https://www.beaconfinancial.co.uk

Birmingham, United Kingdom

January 2023 - May 2023

Performed exploratory data analysis on 2 years of customer transaction history to identify spending patterns and segment users into distinct behavioural groups using clustering techniques

Wrote SQL queries against PostgreSQL databases containing 50+ million records to extract features for predictive modelling tasks

Produced weekly reports documenting data quality issues and anomalies, flagging inconsistencies that prevented errors in downstream processes

Assisted senior analysts in building a fraud detection prototype using decision trees, contributing to data preparation and model evaluation phases

Data Analyst Intern

TechCore Innovations Ltd

https://www.techcore-innovations.io

Birmingham, United Kingdom

July 2022 - December 2022

Conducted statistical analysis on user engagement metrics from the company's web platform, identifying which features drove the highest retention rates among different user segments

Cleaned and validated datasets using Python pandas and NumPy, documenting data quality issues and creating standardised processes for future data intake

Supported the lead analyst in exploratory visualisations using Matplotlib and Seaborn to communicate findings to non-technical stakeholders

Learned foundational SQL and began contributing to internal dashboards that tracked product performance across geographic regions

EDUCATION

MSc Data Science

University of Birmingham

Birmingham, United Kingdom

Graduated September 2022

BSc Mathematics

University of Warwick

Coventry, United Kingdom

Graduated June 2021

TECHNICAL SKILLS

Programming Languages: Python, SQL, R

Libraries and Frameworks: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, TensorFlow basics

Databases: PostgreSQL, MySQL

Tools and Platforms: Tableau, Git, Jupyter Notebook, Google Colab, Excel

Machine Learning: Regression, Classification, Clustering, Model Evaluation, Feature Engineering

Statistical Methods: Hypothesis Testing, Exploratory Data Analysis, A/B Testing
