PROFESSIONAL SUMMARY

Results-driven Principal Engineer with a highly motivated approach to spearheading cutting-edge technical solutions that deliver actionable insights across mission-critical infrastructure. Leveraging a proven track record of cross-functional collaboration, I champion innovative architectures synergistically aligned with organisational objectives. Passionate about delivering value through data-driven decision making in dynamic environments, with expertise in architecting scalable systems that drive competitive advantage through proven technical excellence.

WORK EXPERIENCE

Principal Engineer

TechVenture Solutions

techventure.io

London, United Kingdom

September 2022 - Present

Architected and deployed microservices infrastructure supporting 2 million daily active users, improving system reliability from 98.5% to 99.95% uptime

Led a cross-functional team of 8 engineers in the design and implementation of GPT-4 API integrations for AI-powered feature development, reducing processing time by 45%

Established comprehensive CI/CD pipelines using GitHub Actions and automated testing frameworks, decreasing deployment cycles from 4 hours to 12 minutes

Mentored 12 junior and mid-level engineers, directly contributing to their career progression and promotion to senior roles

Senior Engineer

DataFlow Innovations

dataflow.co

London, United Kingdom

January 2021 - August 2022

Developed and maintained real-time data processing platform handling 500 million events daily using Apache Kafka and Apache Spark

Optimised database query performance through advanced indexing strategies and query rewriting, achieving 60% reduction in average response times

Implemented dbt workflows for data transformation and testing, improving data quality metrics by 75% across all analytical pipelines

Designed scalable authentication and authorisation systems serving multiple business units with zero security incidents during tenure

Software Engineer

CloudCore Systems

www.cloudcore.com

London, United Kingdom

March 2016 - December 2020

Built distributed cloud infrastructure components in Go and Python, supporting enterprise clients across financial services and healthcare sectors

Implemented comprehensive monitoring and alerting systems using Prometheus and Grafana, reducing mean time to detection by 80%

Championed infrastructure-as-code practices using Terraform, enabling 30% faster environment provisioning across development and production

Collaborated with product teams to translate requirements into technical specifications, delivering 15+ major features on schedule

EDUCATION

MSc Computer Science

University of Edinburgh

Edinburgh, United Kingdom

Graduated 2016

BSc Computer Science

University of Manchester

Manchester, United Kingdom

Graduated 2014

TECHNICAL SKILLS

Languages: Go, Python, Java, SQL, Bash

Cloud Platforms: AWS, Google Cloud Platform, Azure

Databases: PostgreSQL, MongoDB, Elasticsearch, Apache Cassandra

Big Data: Apache Kafka, Apache Spark, Hadoop

DevOps and Infrastructure: Terraform, Docker, Kubernetes, Jenkins, GitHub Actions

Monitoring and Observability: Prometheus, Grafana, ELK Stack, Datadog

Architecture Patterns: Microservices, Event-Driven Architecture, CQRS, Domain-Driven Design

Data Engineering: dbt, Apache Airflow, Data Warehousing, ETL Pipeline Design
