PROFESSIONAL SUMMARY

Forward Deployed Engineer with 3 years of hands-on experience supporting field operations and remote infrastructure deployments across multiple sectors. I started my career troubleshooting on-premises systems and have progressed to managing cloud infrastructure and deployment pipelines for distributed teams. I'm most effective when working closely with non-technical stakeholders, translating their needs into technical solutions. Based in Glasgow, I'm looking for roles that blend systems engineering with direct customer engagement.

WORK EXPERIENCE

Forward Deployed Engineer

Proxus Solutions Ltd (Previously known as Proxus Cloud Services) - www.proxus.io

London, United Kingdom

March 2023 - Present

Deployed and maintained containerized applications across 15+ client environments using Docker and Docker Compose for consistent production setups

Provided tier-2 technical support to field teams operating in remote locations, responding to infrastructure issues within 2-hour SLAs

Built automated deployment scripts in Bash and Python that reduced manual configuration time by 40% across multiple customer sites

Collaborated with product team to document technical requirements and translate customer feedback into infrastructure improvements

Site Reliability Engineer

CloudTech Systems - www.cloudtech-systems.com

Manchester, United Kingdom

September 2021 - February 2023

Managed AWS infrastructure for 8 SaaS applications, maintaining 99.5% uptime through proactive monitoring and incident response

Implemented CI/CD pipelines using Jenkins and GitHub Actions, enabling 12+ daily deployments with zero-downtime releases

Wrote infrastructure-as-code templates using CloudFormation to standardize deployment processes across development and production environments

Mentored 2 junior engineers on monitoring best practices and helped establish incident response protocols that reduced mean time to recovery by 35%

Junior Systems Administrator

TechBridge Solutions - www.techbridgesolutions.net

Glasgow, United Kingdom

June 2019 - August 2021

Managed 200+ servers across Windows and Linux environments, applying patches and security updates within maintenance windows

Configured and monitored Nagios monitoring systems to track server health and alert on critical issues, investigating 50+ alerts monthly

Supported Active Directory infrastructure for 500+ users across 3 office locations, managing user provisioning and group policy implementations

Documented all system configurations and runbooks in Confluence, creating knowledge base that reduced average ticket resolution time by 25%

EDUCATION

BSc Computer Science

University of Edinburgh

Edinburgh, United Kingdom

Graduated: June 2019

Grade: Upper Second Class Honours (2:1)

SKILLS

Technical Skills:

AWS, Azure, Docker, Docker Compose, Jenkins, GitHub Actions, CloudFormation, Linux Administration, Windows Server Administration, Active Directory, Nagios, Datadog, Bash Scripting, Python, SQL, Git, Apache, Nginx

Infrastructure and Deployment:

Kubernetes, Terraform, ArgoCD, Helm, Prometheus, Grafana, Ansible, Vagrant, Virtual Machine Management, Network Configuration

Soft Skills:

Customer Relationship Management, Technical Documentation, Incident Response, Troubleshooting, Cross-functional Communication, Training and Mentoring
