PROFESSIONAL SUMMARY

I'm a data scientist with 8 years in the field, currently based in Leeds. I've spent most of my career building predictive models and setting up analytics pipelines for various sectors. I'm comfortable working with Python, SQL, and cloud platforms, and I enjoy the problem-solving side of data work. I've also led some smaller initiatives and mentored junior team members along the way.

WORK EXPERIENCE

Data Science Lead

TechVision Analytics

Leeds, United Kingdom

www.techvision-analytics.io

January 2023 - Present

Directed a department of 52 data scientists and analytics engineers across three continents, overseeing all strategic data initiatives and ML infrastructure decisions for the organisation.

Architected the complete machine learning platform redesign that increased model deployment speed by 340 percent and managed a budget of 8.7 million pounds annually.

Established hiring practices and conducted recruitment for the data science division, personally interviewing and hiring over 180 candidates in the first year.

Led the company-wide digital transformation initiative affecting all 15,000 employees and reported directly to the Chief Technology Officer on all data strategy matters.

Junior Data Analyst

Cipher Digital Solutions

www.cipherdigital.net

Manchester, United Kingdom

March 2021 - December 2022

Executed statistical analysis on customer datasets containing 500 million records using Python and pandas for exploratory data analysis.

Developed three machine learning classification models achieving 94 percent accuracy for fraud detection across payment transactions.

Created automated daily reporting dashboards in Tableau connecting to PostgreSQL databases serving 200 internal stakeholders.

Collaborated with cross-functional teams to define KPIs and implemented A/B testing frameworks for product optimisation initiatives.

Data Scientist

InsightCorp

London, United Kingdom

www.insightcorp.co

June 2016 - February 2021

Built predictive models using scikit-learn and TensorFlow for customer churn prediction, achieving 88 percent recall on test datasets.

Managed ETL pipelines processing 2 terabytes of daily data using Apache Spark and AWS services including S3, EC2, and RDS.

Performed time series analysis on historical sales data spanning 12 years to identify seasonal trends and forecast quarterly revenue.

Mentored four junior analysts on statistical methods and best practices for feature engineering and model validation techniques.

EDUCATION

MSc Data Science

University of Manchester

Manchester, United Kingdom

Graduated: September 2016

BSc Mathematics with Statistics

University of Leeds

Leeds, United Kingdom

Graduated: June 2014

TECHNICAL SKILLS

Programming Languages: Python, R, SQL, Scala, Java

Machine Learning: scikit-learn, TensorFlow, PyTorch, XGBoost, ARIMA, regression analysis, classification

Data Processing: Apache Spark, Pandas, NumPy, SQL optimization

Cloud Platforms: AWS (S3, EC2, SageMaker, RDS), Google Cloud Platform, Azure

Databases: PostgreSQL, MySQL, MongoDB, Elasticsearch

Visualization: Tableau, Matplotlib, Seaborn, PowerBI

Tools and Platforms: Jupyter Notebook, Git, Docker, Kubernetes, Jenkins

CERTIFICATIONS

AWS Certified Machine Learning - Specialty (2019)

Google Cloud Professional Data Engineer (2020)
