PROFESSIONAL SUMMARY

Results-driven Senior Data Analyst with 8 years of progressive experience in business intelligence, statistical analysis, and data visualisation across financial services and healthcare sectors. I started my career doing spreadsheet work in a small finance team and somehow ended up leading a 23-person analytics department before moving back into individual contributor roles. I'm most comfortable when I'm actually doing the analysis work rather than managing people, and I have a genuine passion for finding patterns in messy datasets that help organisations make better decisions.

WORK EXPERIENCE

Senior Data Analyst

Vortex Analytics Solutions

www.vortexanalytics.io

Glasgow, United Kingdom

January 2021 - Present (3+ years)

Designed and maintained 15+ automated reporting dashboards using Tableau and Power BI serving C-suite executives and departmental heads

Conducted advanced statistical analyses on customer behaviour datasets comprising 2.5 million records, identifying revenue uplift opportunities worth GBP 340,000 annually

Led cross-functional projects with IT and marketing teams to implement data governance frameworks and improve data quality standards

Mentored 3 junior analysts on SQL query optimisation, statistical methodologies, and stakeholder communication

Data Analytics Manager

Pinnacle Financial Intelligence Ltd

www.pinnaclefinancial.co.net

Edinburgh, United Kingdom

November 2019 - March 2021 (1 year, 5 months)

Managed a team of 23 data analysts and reporting specialists across three office locations, overseeing all aspects of project delivery and performance management

Established data warehouse architecture using SQL Server and implemented ETL pipelines processing 500GB of daily transaction data

Presented monthly insights and forecasts to board-level stakeholders, directly influencing strategic business decisions worth GBP 2 million+ investment

Reduced reporting delivery time by 60% through automation and process redesign initiatives

Mid-Level Data Analyst

Tesco PLC

www.tesco.com

Glasgow, United Kingdom

June 2018 - January 2021 (2 years, 8 months)

Analysed sales and inventory data across 200+ retail locations to optimise stock levels and identify demand trends using Python and R

Created automated monthly performance reports and ad-hoc analyses for store managers and regional directors

Developed customer segmentation models using clustering algorithms that improved targeted marketing campaign effectiveness by 35%

Collaborated with supply chain and merchandising teams to provide analytical support for category and promotional planning
