PROFESSIONAL SUMMARY

Results-driven and highly motivated Senior Software Engineer with a proven track record of delivering cutting-edge solutions that drive actionable insights and organisational objectives. Passionate about leveraging innovative technologies to champion mission-critical applications through dynamic cross-functional collaboration. Spearhead data-driven decision making initiatives to synergistically align technical excellence with business outcomes, whilst maintaining a commitment to delivering exceptional value across all stakeholder engagement touchpoints.

WORK EXPERIENCE

Senior Software Engineer

TechVision Solutions (Previously known as Innovate Digital Labs), Glasgow, United Kingdom

www.techvisionsolutions.io

January 2022 - Present

Architected and deployed a microservices-based payment processing system handling 2 million daily transactions, resulting in a 40% reduction in processing latency and improved system reliability to 99.95% uptime.

Led a team of four junior developers in the redesign of the legacy customer portal, implementing modern frontend frameworks and establishing coding standards that reduced bug reports by 35% within the first quarter.

Implemented comprehensive API monitoring and alerting infrastructure using industry-standard observability tools, enabling proactive incident response and reducing mean time to resolution from 2 hours to 15 minutes.

Mentored three junior engineers through their professional development, conducting code reviews, technical workshops, and career guidance sessions that supported two promotions within the engineering team.

Software Engineer

Accenture

Glasgow, United Kingdom

www.accenture.com

August 2019 - December 2021

Developed and maintained full-stack web applications using Java Spring Boot and React for a leading financial services client with user bases exceeding 500,000 active users.

Collaborated with product managers and UX designers to translate business requirements into technical specifications, delivering features that improved customer satisfaction scores by 28%.

Optimised database query performance by refactoring legacy SQL queries and implementing strategic indexing, achieving a 45% improvement in average page load times.

Participated in agile sprint ceremonies and contributed to the continuous improvement of development practices through retrospective feedback and process automation initiatives.

Junior Software Engineer

Nexus Development Group, Glasgow, United Kingdom

nexus-dev.co.net

June 2018 - July 2019

Built and tested RESTful APIs using Python and Flask for various client projects, ensuring code quality through unit testing and achieving 78% code coverage targets.

Contributed to the migration of a legacy monolithic application to a distributed architecture, learning cloud deployment practices and infrastructure fundamentals in a fast-paced environment.

Fixed production bugs and resolved customer-reported issues with a 24-48 hour turnaround time, demonstrating strong problem-solving skills and attention to detail.

Documented technical implementations and created knowledge base articles to support team onboarding and knowledge sharing across the organisation.

EDUCATION

BSc (Hons) Computer Science

University of Glasgow

Glasgow, United Kingdom

2014 - 2018
