PROFESSIONAL SUMMARY

I'm a full stack engineer with five years of experience building web applications and backend systems. I've worked across startups and established tech companies, focusing on Python and JavaScript ecosystems. I'm most comfortable when I can own features from database design through to user interface, and I enjoy mentoring junior developers on my teams.

WORK EXPERIENCE

Full Stack Engineer

Meridian Systems Ltd

meridian-systems.io

Cambridge, United Kingdom

January 2021 - Present (3 years 11 months)

Developed and maintained multiple microservices handling real-time data processing for financial clients using Python and FastAPI

Implemented GPT-4 API integrations into customer-facing dashboards, enabling AI-powered document analysis features

Built React frontend components with Redux state management, improving application performance by 35 percent

Led migration of legacy monolithic application to containerized architecture using Docker and Kubernetes, reducing deployment time from 4 hours to 15 minutes

Senior Full Stack Engineer

Prism Technology Group

prism-tech.co

London, United Kingdom

March 2019 - March 2021 (2 years)

Architected and deployed a full-stack SaaS platform serving 200 concurrent users with Node.js backend and Vue.js frontend

Established CI/CD pipelines using GitHub Actions, automating testing and deployment processes across development and production environments

Designed PostgreSQL database schemas and implemented complex query optimizations reducing average response time from 800ms to 120ms

Mentored three junior developers on backend best practices and code review processes, with two promoted to mid-level roles

Junior Full Stack Engineer

TechCore Solutions

www.techcoresolutions.com

Cambridge, United Kingdom

June 2018 - December 2020 (2 years 7 months)

Developed RESTful APIs using Python Django and contributed to front-end features in Angular, handling authentication and user management modules

Wrote and maintained automated test suites achieving 78 percent code coverage using pytest and Jasmine frameworks

Collaborated with product and design teams to translate wireframes into responsive web components across desktop and mobile platforms

Participated in code reviews and contributed to company-wide documentation standards for API design and database migrations

EDUCATION

Bachelor of Science in Computer Science

University of Manchester

Manchester, United Kingdom

2014 - 2018

SKILLS

Backend Development: Python, FastAPI, Django, Node.js, Express.js

Frontend Development: React, Vue.js, Angular, HTML5, CSS3, JavaScript

Databases: PostgreSQL, MongoDB, Redis

Cloud and DevOps: AWS, Docker, Kubernetes, CI/CD pipelines

Other Tools: Git, RESTful API design, SQL optimization, Microservices architecture
