PROFESSIONAL SUMMARY

I'm a detail-oriented BI Analyst with a passion for turning raw data into actionable insights. I've spent the last year working with SQL, Power BI, and Python to support business decision-making across different sectors. I'm particularly interested in data visualization and helping non-technical stakeholders understand complex datasets. When I'm not working with dashboards, you'll find me exploring new data tools or contributing to open-source projects.

WORK EXPERIENCE

BI Analyst

DataVault Analytics Ltd

Glasgow, United Kingdom

www.datavaultanalytics.com

November 2023 - Present

Developed and maintained 15+ Power BI dashboards serving executive and operational teams across the organization

Created automated SQL queries to extract and transform data from multiple source systems, reducing manual reporting time by 40%

Collaborated with business stakeholders to gather requirements and translate them into technical specifications for new reporting solutions

Documented data models and created user guides to enable self-service analytics across different departments

Junior Data Analyst

Synapse Data Ltd

Glasgow, United Kingdom

www.synapsedata.io

August 2022 - January 2024

Supported the analysis of customer behavioral datasets using SQL and Python for trend identification and reporting

Built interactive dashboards in Tableau to track KPIs for marketing and sales teams, with weekly updates and performance metrics

Performed data quality checks and validation routines on incoming datasets to ensure accuracy before processing

Participated in daily stand-ups and contributed to documentation of data processes and analytical methodologies

Data Analyst Intern

Deloitte

Glasgow, United Kingdom

www.deloitte.com/en-gb

June 2022 - September 2022

Assisted senior analysts in creating reports and dashboards using Excel and basic SQL queries

Conducted exploratory data analysis on sales datasets to identify patterns and areas for business improvement

Supported the preparation of data for quarterly business reviews and stakeholder presentations

Learned fundamentals of data warehousing concepts and gained exposure to enterprise analytics platforms

EDUCATION

Bachelor of Science in Business Analytics

University of Glasgow

Glasgow, United Kingdom

Graduated: June 2022

Grade: 2:1
