PROFESSIONAL SUMMARY

Recent graduate with a passion for automation and cloud infrastructure. I started my career wanting to understand how systems actually work in production environments, and I've spent the last year learning Docker, Kubernetes, and AWS on real projects. I'm comfortable with Linux administration and basic scripting, though I'm still building confidence with complex deployment pipelines. I enjoy problem-solving under pressure and I'm looking for a role where I can grow my technical skills while contributing meaningfully to a team.

WORK EXPERIENCE

DevOps Engineer (Junior)

TechVault Systems

techvaultsystems.com

London, United Kingdom

June 2023 - Present

Deployed and maintained containerised applications using Docker and Docker Compose across development and staging environments

Assisted in building CI/CD pipelines using GitLab CI, reducing manual deployment time by approximately 30 percent

Monitored application performance using Prometheus and Grafana, identifying and escalating critical issues to senior engineers

Documented infrastructure setup procedures and created runbooks for common troubleshooting scenarios

DevOps Support Engineer

CloudPeak Technologies Ltd

cloudpeak.io

London, United Kingdom

March 2023 - May 2023

Provisioned AWS EC2 instances and managed security groups according to application requirements

Performed daily log reviews and system health checks, documenting findings in incident tracking systems

Collaborated with development teams to troubleshoot deployment failures and environment configuration issues

Gained hands-on experience with Terraform for basic infrastructure as code tasks

Systems Administrator (Intern)

Accenture UK

accenture.com

London, United Kingdom

September 2022 - February 2023

Managed user access controls and permissions across Windows and Linux servers

Performed routine server maintenance including patch management and disk space monitoring

Assisted with office network infrastructure setup and resolved connectivity issues for end users

Created technical documentation and process guides for junior IT support staff

EDUCATION

Bachelor of Science in Computer Science

University of Leeds

Leeds, United Kingdom

Graduated: June 2022

Relevant Coursework: Linux Administration, Database Management Systems, Computer Networks, Software Development Fundamentals

TECHNICAL SKILLS

Cloud Platforms: Amazon Web Services (EC2, S3, RDS, VPC)

Containerisation: Docker, Docker Compose

Orchestration: Kubernetes (basic understanding)

CI/CD Tools: GitLab CI, basic Jenkins experience

Infrastructure as Code: Terraform

Monitoring and Logging: Prometheus, Grafana, CloudWatch

Scripting Languages: Bash, Python (beginner level)

Operating Systems: Linux (CentOS, Ubuntu), Windows Server

Version Control: Git, GitLab

Databases: MySQL, PostgreSQL (basic administration)

Web Servers: Apache, Nginx

Other Tools: Ansible (fundamental knowledge), systemd, SSH

CERTIFICATIONS

AWS Certified Cloud Practitioner (Expected: December 2024)

CompTIA Security+ (In Progress)
