PROFESSIONAL SUMMARY

Results-driven BI Analyst with 12 years of experience building data solutions for financial services and retail sectors. I got into this field after realizing I enjoyed solving problems with numbers more than people, and I've spent the last decade automating reporting processes and helping stakeholders understand what their data actually means. I'm comfortable presenting findings to both technical teams and C-suite executives, and I've consistently delivered projects that reduced manual reporting time by 60% or more.

WORK EXPERIENCE

Senior BI Analyst

DataViz Solutions Ltd

London, United Kingdom

www.dataviz-solutions.io

January 2019 - November 2023

Designed and implemented enterprise reporting architecture supporting 200+ concurrent users across FTSE 100 clients, utilizing Tableau and Snowflake for real-time dashboard delivery

Developed complex ETL pipelines using Python and SQL to consolidate data from 15+ disparate systems, improving data refresh cycles from weekly to near real-time

Led a team of 2 junior analysts through major reporting platform migration, documenting standards and best practices that reduced future development time by 40%

Mentored 5 analysts on advanced SQL optimization techniques and dimensional modeling, resulting in 3 internal promotions within 18 months

BI Developer

Compass Financial Group

London, United Kingdom

www.compass-financial.co.uk

September 2017 - August 2019

Built 40+ dashboards and reports in Power BI serving risk, compliance, and operations teams across the organization

Automated monthly reporting cycles using VBA and scheduled SQL Server jobs, eliminating 120 hours of manual work annually

Implemented data validation rules and quality checks that identified and prevented 8 critical reconciliation errors in FY2018

Collaborated with business analysts and finance directors to translate requirements into technical specifications and iterative dashboard prototypes

Analytics Analyst

Sterling Retail Solutions

Manchester, United Kingdom

www.sterlingretail.net

June 2011 - August 2017

Constructed data warehouse schemas using star and snowflake methodologies to support sales, marketing, and inventory teams across 200+ store locations

Generated executive dashboards tracking KPIs including sales trends, customer acquisition, and inventory turnover using Tableau and QlikView

Performed statistical analysis on customer segmentation data, identifying high-value customer cohorts that drove targeted marketing campaigns with 35% higher conversion rates

Maintained and optimized reporting database performance, achieving 99.2% uptime and reducing query execution times by 30% through indexing and query tuning

EDUCATION

Bachelor of Science in Computer Science

University of Manchester

Manchester, United Kingdom

Graduated: 2011
