PROFESSIONAL SUMMARY

Experienced DevOps Engineer with 6 years of hands-on infrastructure and deployment expertise. I've spent the last few years building scalable systems at fast-growing tech companies, focusing on automation, cloud infrastructure, and making developers' lives easier. I enjoy working across the full stack from containerisation to monitoring, and I'm particularly interested in helping teams adopt better practices around infrastructure as code and continuous deployment.

TECHNICAL SKILLS

Cloud Platforms: AWS, Google Cloud Platform, Azure

Containerisation: Docker, Kubernetes, Docker Swarm

Infrastructure as Code: Terraform, CloudFormation, Ansible

CI/CD: Jenkins, GitLab CI, CircleCI, Bitbucket Pipelines

Programming Languages: Python, Bash, Go

Monitoring and Logging: Prometheus, Grafana, ELK Stack, Datadog

Databases: PostgreSQL, MySQL, Redis, MongoDB

Version Control: Git, GitHub, GitLab

Configuration Management: Chef, Puppet

Other: Nginx, Apache, HAProxy, AWS Lambda

WORK EXPERIENCE

Senior DevOps Engineer

TechCore Solutions Ltd

techcore.io

Leeds, United Kingdom

March 2022 - Present

Designed and implemented a multi-region Kubernetes cluster supporting 200+ microservices across AWS and GCP, reducing deployment time from 45 minutes to 8 minutes.

Established infrastructure as code practices using Terraform and Ansible, managing over 150 infrastructure modules and reducing manual configuration errors by 92%.

Built comprehensive monitoring stack using Prometheus and Grafana with custom alerting rules, improving incident response time from 30 minutes to under 5 minutes.

Led migration of legacy applications from EC2 to containerised environments, resulting in 35% cost reduction and improved resource utilisation.

DevOps Engineer

Innovate Digital Ltd

innovate-digital.co

Manchester, United Kingdom

July 2019 - February 2022

Implemented GitLab CI pipelines for 40+ development teams, enabling automated testing and deployment across staging and production environments using the GPT-4 API for intelligent logging analysis.

Managed AWS infrastructure including RDS, ElastiCache, and CloudFront, optimising database performance and reducing latency by 28%.

Developed Python automation scripts for infrastructure provisioning and maintenance, saving approximately 10 hours per week across operations team.

Mentored junior engineers on containerisation best practices and Kubernetes deployment patterns, supporting professional development for 4 team members.

DevOps Engineer

CloudFirst Startup

cloudfirst.net

Leeds, United Kingdom

September 2018 - June 2019

Established Docker-based development environment standardising deployment process across 15-person engineering team.

Configured and maintained Jenkins CI/CD pipelines for continuous integration and automated deployments to AWS infrastructure.

Implemented monitoring and logging solutions using the ELK Stack to provide visibility into application performance and system health.

Collaborated with security team to implement SSL/TLS certificates and establish baseline security hardening practices for all servers.

EDUCATION

BSc Computer Science

University of Leeds

Leeds, United Kingdom

2015 - 2018

CERTIFICATIONS

AWS Certified Solutions Architect Associate

Certified Kubernetes Administrator (CKA)

PUBLIC REPOSITORIES

github.com/jmitchell-devops/kubernetes-terraform-aws - Terraform modules for provisioning production-grade Kubernetes clusters on AWS with VPC, security groups, and IAM configuration.

github.com/jmitchell-devops/prometheus-grafana-stack - Docker Compose setup for Prometheus, Grafana, and Alertmanager with pre-configured dashboards and alert rules for microservices monitoring.

github.com/jmitchell-devops/ansible-playbooks - Collection of Ansible playbooks for server configuration management including web servers, databases, and security hardening.

github.com/jmitchell-devops/python-aws-automation - Python library for AWS resource management and cost optimisation with automatic cleanup of unused resources.
