PROFESSIONAL SUMMARY

Forward Deployed Engineer with 2 years of hands-on experience supporting field operations and remote infrastructure deployments. Passionate about troubleshooting complex system issues under pressure and translating technical solutions for non-technical stakeholders. I've worked across cloud deployments, network diagnostics, and on-site infrastructure support, with a particular interest in automation and reducing manual operational overhead. Based in Cambridge and looking to deepen my expertise in distributed systems and edge computing environments.

WORK EXPERIENCE

Forward Deployed Engineer

Synapse Data Ltd

Cambridge, United Kingdom

September 2023 - Present

Deployed and maintained Python-based monitoring systems across 12 customer sites in UK and Europe, reducing incident response time by 35 percent

Provided remote technical support and on-site troubleshooting for infrastructure issues, collaborating with customer operations teams via Slack and ticket systems

Documented deployment procedures and created runbooks for common failure scenarios, improving team efficiency by standardising response protocols

Configured and maintained Ubuntu Linux servers, implemented Docker containerisation for consistency across environments, and managed SSL certificate renewals across distributed infrastructure

Systems Engineer

Accenture

London, United Kingdom

January 2023 - August 2023

Supported deployment of Azure virtual machines and networking infrastructure for financial services clients during their digital transformation projects

Diagnosed and resolved network connectivity issues affecting 200 plus users across multiple sites, working with senior engineers to implement permanent fixes

Created Bash scripts to automate routine server patching and log analysis tasks, reducing manual effort by approximately 10 hours per month

Maintained detailed documentation of system configurations and disaster recovery procedures for three client environments

Junior Infrastructure Technician

UKCloud Ltd

www.ukcloud.com

Slough, United Kingdom

June 2022 - December 2022

Provisioned and configured OpenStack instances for UK public sector clients, ensuring compliance with government security standards

Monitored system performance using Prometheus and Grafana dashboards, identifying resource bottlenecks and alerting senior staff to potential issues

Assisted in planning and executing infrastructure maintenance windows with zero-downtime requirements, coordinating across multiple customer accounts

Troubleshot hardware failures in data centre environments including disk replacements, network switch configuration, and server console access issues

EDUCATION

Bachelor of Science in Computer Science

University of Cambridge

Cambridge, United Kingdom

Graduated June 2022

TECHNICAL SKILLS

Linux Systems: Ubuntu, CentOS, basic kernel troubleshooting

Cloud Platforms: Azure, OpenStack, AWS fundamentals

Scripting and Automation: Bash, Python, basic Git workflows

Monitoring and Logging: Prometheus, Grafana, ELK stack basics

Containerisation: Docker, basic Kubernetes understanding

Networking: TCP/IP fundamentals, DNS, SSH, VPN configuration

Tools and Platforms: Jira, Confluence, Ansible basics, Terraform basics

PUBLIC REPOSITORIES

jamesmitch92/deploy-monitoring-stack - Python Flask application for real-time infrastructure health monitoring with Prometheus integration

jamesmitch92/linux-automation-scripts - Collection of Bash scripts for automated server provisioning and log parsing

jamesmitch92/docker-multi-env-setup - Docker Compose configurations for local development environment matching production Linux setup

jamesmitch92/azure-infrastructure-as-code - Terraform modules for repeatable Azure VM and networking deployments

CERTIFICATIONS AND TRAINING

CompTIA Security Plus (Completed coursework, exam scheduled Q2 2024)

Linux Foundation Certified Associate (LFCA) - In Progress

Azure Fundamentals (AZ-900) - Passed September 2023
