PROFESSIONAL SUMMARY

Experienced Frontend Engineer with 12 years in web development, currently at Staff level. I've spent most of my career building scalable user interfaces and leading architectural decisions across complex applications. I'm based in Birmingham and enjoy mentoring junior developers while staying hands-on with modern JavaScript frameworks. Outside of work, I'm particularly interested in web performance optimization and accessible design patterns.

WORK EXPERIENCE

Graduate Frontend Developer

Nexus Digital Co

nexusdigital.io

Birmingham, United Kingdom

June 2012 - December 2013

Developed responsive web interfaces using HTML5, CSS3, and jQuery for e-commerce clients

Built pixel-perfect designs from Photoshop mockups and contributed to the company design system

Managed a team of 25 senior engineers across three departments and coordinated stakeholder meetings

Led the migration of legacy codebases to modern frameworks, delivering on multiple critical projects

Staff Frontend Engineer

Cognizant Technology Solutions

https://www.cognizant.com

Birmingham, United Kingdom

January 2014 - August 2015

Architected component libraries and established frontend best practices across the organization

Optimized application performance through code splitting and lazy loading techniques

Collaborated with UX designers to implement user research findings into production features

Mentored and line-managed teams of junior developers on modern React patterns and testing strategies

Senior Frontend Engineer

Sky

https://www.sky.com

Birmingham, United Kingdom

September 2015 - Present

Led the redesign of customer-facing dashboards resulting in 35% improvement in Core Web Vitals

Implemented comprehensive TypeScript adoption across the frontend codebase with zero breaking changes

Developed accessible components meeting WCAG 2.1 AA standards and established accessibility guidelines

Pioneered a component testing strategy using React Testing Library that reduced production bugs by 42%
