PROFESSIONAL SUMMARY

Experienced DevOps Engineer with 5 years in infrastructure automation and cloud deployments across AWS and Azure environments. I've built CI/CD pipelines that reduced deployment times by 60% and implemented monitoring solutions that cut incident response times significantly. I enjoy solving infrastructure problems through code and documentation, and I'm comfortable working in fast-paced teams where reliability matters. Based in Manchester and actively looking for roles where I can help teams ship faster without sacrificing stability.

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, S3, RDS, Lambda, CloudFormation), Azure (App Service, Virtual Machines, DevOps)

Container Technologies: Docker, Docker Compose

Orchestration: Kubernetes, ArgoCD

Infrastructure as Code: Terraform, Ansible, CloudFormation

CI/CD: Jenkins, GitLab CI, GitHub Actions, CircleCI

Monitoring and Logging: Prometheus, Grafana, ELK Stack, CloudWatch

Scripting Languages: Bash, Python, PowerShell

Version Control: Git, GitHub, GitLab

Databases: PostgreSQL, MySQL, MongoDB

Other Tools: Nginx, Apache, Linux Administration, Helm

WORK EXPERIENCE

DevOps Engineer

TechVerse Solutions

https://techverse.io

Manchester, United Kingdom

February 2022 - Present

Designed and maintained Kubernetes clusters running 40+ microservices in production with 99.8% uptime across AWS and Azure environments

Developed Python automation scripts to manage infrastructure provisioning, reducing manual configuration time by 45% and cutting human errors

Implemented comprehensive monitoring with Prometheus and Grafana, creating 30+ dashboards that gave teams real-time visibility into application performance

Led migration of legacy monolithic application to containerised microservices architecture, training 8 team members on Docker and container best practices

Senior DevOps Engineer

CloudNine Digital Ltd

https://cloudninedigital.co

Manchester, United Kingdom

July 2019 - January 2022

Built and optimised CI/CD pipelines using Jenkins and GitLab CI that reduced deployment times from 2 hours to 25 minutes for 12 different projects

Architected infrastructure using Terraform that managed 150+ AWS resources, enabling Infrastructure as Code practices across the engineering team

Automated database backup and disaster recovery procedures using Bash scripts and Lambda functions, achieving RPO of 1 hour and RTO of 4 hours

Implemented the GPT-4 API for predictive monitoring alerts that helped teams anticipate infrastructure failures before they impacted users

Infrastructure Technician

DataFlow Systems

https://dataflowsystems.net

Manchester, United Kingdom

April 2018 - June 2019

Provisioned and managed Linux and Windows servers across on-premises and AWS cloud environments, supporting 200+ internal staff

Maintained application deployment processes using Ansible playbooks, reducing deployment failures from 15% to 2% within 6 months

Configured monitoring systems with ELK Stack (Elasticsearch, Logstash, Kibana) that centralised logs from 50+ servers and applications

Responded to production incidents and performed root cause analysis, documenting findings in internal wiki to prevent recurrence

EDUCATION

BSc Computer Science

University of Manchester

Manchester, United Kingdom

Graduated: June 2018

PUBLIC REPOSITORIES

jharrison92/docker-compose-wordpress - Docker Compose configuration for WordPress development environments with local database and Nginx reverse proxy

jharrison92/terraform-aws-vpc - Reusable Terraform modules for provisioning VPCs, subnets, security groups and NAT gateways on AWS

jharrison92/prometheus-grafana-stack - Complete monitoring stack with Prometheus scrape configurations and pre-built Grafana dashboards for common metrics

jharrison92/ansible-linux-hardening - Ansible playbooks for securing Ubuntu and CentOS systems with firewall rules, SSH configuration and fail2ban setup
