PROFESSIONAL SUMMARY

I'm a data scientist with 2 years of hands-on experience building machine learning models and analysing complex datasets. I started my career working with Python and SQL to solve real business problems, and I've developed a solid foundation in statistical analysis and data visualisation. I'm particularly interested in predictive modelling and I'm always looking for opportunities to expand my technical skills in new areas.

WORK EXPERIENCE

Data Scientist

TechVista Analytics

Leeds, United Kingdom

techvistaanalytics.io

January 2023 - Present

Developed and deployed 3 machine learning models using Python scikit-learn and XGBoost to predict customer churn with 84% accuracy, directly supporting retention strategies for 12 client accounts.

Built automated ETL pipelines using Python and SQL to process 500GB+ of customer transactional data daily, reducing manual reporting time by 15 hours per week.

Created interactive dashboards using Tableau and Power BI for stakeholder presentations, translating complex data findings into actionable business insights for C-level executives.

Collaborated with backend engineers to integrate model predictions into production systems, ensuring real-time scoring capabilities for live customer data.

Junior Data Analyst

Cascade Digital Solutions Ltd

Leeds, United Kingdom

cascadedigital.co.net

June 2022 - December 2022

Performed exploratory data analysis on 8 different customer datasets using Python pandas and matplotlib, identifying 12 key business trends that informed product strategy decisions.

Conducted A/B testing on marketing campaign data, analyzing statistical significance and generating reports that influenced budget allocation across 5 marketing channels.

Cleaned and validated raw data from multiple sources including APIs and CSV exports, achieving 98% data quality standards for downstream analytics teams.

Assisted senior analysts in building logistic regression models for lead scoring, contributing to a 22% improvement in sales pipeline conversion rates.

Data Science Intern

Optimus Research Group

www.optimusresearch.co.uk

Leeds, United Kingdom

September 2021 - May 2022

Analyzed survey data from 5000+ respondents using Python and statistical methods to identify customer satisfaction patterns and trends across demographic segments.

Supported data visualization projects by creating plots and charts to communicate findings to non-technical stakeholders and project managers.

Assisted in data collection and preprocessing tasks, learning best practices for handling missing values and outlier detection in real-world datasets.

Participated in weekly knowledge-sharing sessions with the analytics team, gaining exposure to industry techniques and emerging tools in data science.

EDUCATION

Bachelor of Science in Mathematics with Statistics

University of Leeds

Leeds, United Kingdom

Graduated: June 2021

Grade: 2:1 (Upper Second Class Honours)

SKILLS

Technical Skills: Python, SQL, R, Machine Learning, Scikit-learn, XGBoost, TensorFlow, Pandas, NumPy, Matplotlib, Seaborn, Tableau, Power BI, Git, Statistical Analysis, Hypothesis Testing, Linear Regression, Logistic Regression, Decision Trees, Clustering Algorithms

Tools and Platforms: Jupyter Notebook, Google Colab, AWS S3, PostgreSQL, MySQL, Excel, Anaconda, GitHub

Domain Knowledge: Customer Analytics, Churn Prediction, A/B Testing, Data Visualization, ETL Processes, Feature Engineering

GITHUB REPOSITORIES

github.com/ojhart92/customer-churn-prediction - Machine learning project predicting customer churn using logistic regression and random forest models with hyperparameter tuning.

github.com/ojhart92/sentiment-analysis-nlp - Natural language processing project analyzing customer reviews using VADER and TextBlob sentiment analysis libraries.

github.com/ojhart92/time-series-forecasting - Time series analysis and forecasting of e-commerce sales data using ARIMA and Exponential Smoothing methods.

github.com/ojhart92/exploratory-data-analysis-toolkit - Collection of Python functions and utilities for automated exploratory data analysis and visualization workflows.

CERTIFICATIONS AND ADDITIONAL TRAINING

Google Cloud Certified Associate Cloud Engineer (In Progress)

Coursera Machine Learning Specialization by Andrew Ng - Completed 3 of 5 courses

DataCamp Python for Data Science - Completed February 2022
