PROFESSIONAL SUMMARY

Data analyst with 12 years of experience building reporting systems and dashboards for financial services and healthcare organisations. I've spent most of my career taking messy datasets and turning them into insights that actually drive business decisions. I'm methodical about data quality and I enjoy working with stakeholders to understand what they really need, not just what they think they're asking for. Currently based in Edinburgh and looking to apply my experience with larger-scale data infrastructure projects.

WORK EXPERIENCE

Senior Data Analyst

DataVault Solutions Ltd

https://www.datavault.com

London, United Kingdom

January 2019 - Present

Designed and maintained 15+ operational dashboards used by senior leadership for quarterly business reviews, resulting in 40% faster decision-making cycles.

Built automated data pipelines to consolidate data from 8 different source systems using SQL and Python, reducing manual reporting effort by 30 hours per week.

Led the migration of legacy reporting infrastructure from on-premises to cloud, improving query performance by 65% and reducing infrastructure costs by £120k annually.

Mentored 4 junior analysts on best practices in data modelling, SQL optimisation, and documentation standards.

Data Analytics Manager

Cipher Analytics Group

https://www.cipheranalytics.io

Edinburgh, United Kingdom

June 2015 - December 2018

Managed a team of 3 data analysts and coordinated with product, finance, and operations departments to deliver 20+ ad-hoc analysis projects annually.

Implemented Tableau as the primary business intelligence platform for the organisation, training 50+ users across 6 departments on dashboard creation and consumption.

Created comprehensive data governance framework including data dictionary, validation rules, and access control policies across all analytics systems.

Developed predictive models using statistical analysis to forecast customer churn, achieving 78% accuracy and identifying retention opportunities worth £2.3m in annual revenue.

Data Analyst

Meridian Health Consulting

Edinburgh, United Kingdom

September 2012 - May 2015

Extracted and transformed healthcare claims data from multiple systems to create monthly performance reports for NHS trust partners and private clients.

Built patient outcome analysis dashboard tracking 12 key performance indicators for a 500-bed teaching hospital, reducing reporting time from 2 weeks to 2 days.

Performed quality assurance on raw datasets and maintained audit logs for all data transformations to ensure compliance with information governance standards.

Collaborated with clinical teams to validate calculated metrics and ensure analytical outputs aligned with clinical definitions and requirements.

EDUCATION

MSc Data Science

University of Edinburgh

2011

BSc Statistics

University of Bristol

2009
