PROFESSIONAL SUMMARY

Full Stack Engineer with 7 years of experience building scalable web applications and leading technical teams. I've spent the last decade working across the entire stack, from React frontends to Node.js backends and cloud infrastructure. I'm particularly interested in solving performance bottlenecks and mentoring junior developers. I live in Leeds with my family and spend weekends tinkering with home automation projects.

WORK EXPERIENCE

Senior Full Stack Engineer

TechVenture Solutions

techventure.io

Leeds, United Kingdom

January 2022 - Present

Architected and deployed microservices infrastructure handling 2 million daily requests across multiple Node.js applications and PostgreSQL databases

Led a team of 4 developers through migration from monolithic application to containerised services using Docker and Kubernetes on AWS

Implemented real-time data synchronisation features using WebSockets and Redis, reducing API response times by 40%

Established automated testing pipeline achieving 82% code coverage with Jest and introduced weekly code review practices that reduced production incidents by 35%

Full Stack Engineer

Digital Dynamics Ltd

www.digitaldynamics.co.uk

Manchester, United Kingdom

September 2020 - December 2021

Developed customer-facing web applications using React, TypeScript, and Express.js serving over 500,000 monthly active users

Optimised database queries and implemented caching strategies that improved page load times from 3.2 seconds to 1.1 seconds

Collaborated with UX designers and product managers to deliver 15 feature releases across 4 quarterly cycles

Maintained legacy PHP codebase while gradually migrating functionality to modern Node.js stack, managing technical debt across 8 modules

Senior Full Stack Developer

Nexus Digital Group

nexusdigital.net

Leeds, United Kingdom

July 2018 - January 2021

Designed and built RESTful APIs using Node.js and Express serving React frontend with JWT authentication and role-based access control

Implemented automated deployment pipeline using GitHub Actions and Terraform, reducing release cycle from 2 weeks to 2 days

Mentored 3 junior developers and conducted technical interviews for engineering hires, resulting in 8 successful placements

Managed AWS infrastructure including EC2, RDS, S3, and CloudFront, reducing monthly cloud costs by 28% through resource optimisation

EDUCATION

Bachelor of Science in Computer Science

University of Leeds

Leeds, United Kingdom

Graduated: June 2017

SKILLS

Backend: Node.js, Express.js, Python, PHP, RESTful APIs, GraphQL, Microservices

Frontend: React, TypeScript, JavaScript, HTML5, CSS3, Redux, Material-UI

Databases: PostgreSQL, MongoDB, MySQL, Redis

Cloud & DevOps: AWS (EC2, RDS, S3, CloudFront), Docker, Kubernetes, Terraform, GitHub Actions, CI/CD

Testing: Jest, Mocha, React Testing Library, Postman

Tools & Platforms: Git, Linux, VS Code, Agile/Scrum, Jira
