PROFESSIONAL SUMMARY

Mid-level full stack engineer with 4 years of commercial experience building web applications across startups and established tech firms. I've worked with modern JavaScript frameworks and backend systems, though I tend to favour pragmatic solutions over chasing every new tool. Based in Bristol, I'm looking for roles where I can contribute to meaningful products while continuing to develop my backend architecture skills.

WORK EXPERIENCE

Full Stack Engineer

TechVault Solutions

techvault.io

Bristol, United Kingdom

August 2022 - Present

Developed and maintained React-based frontend applications serving 50,000+ active users, implementing responsive designs and complex state management patterns using Redux Toolkit.

Built Node.js REST APIs with Express framework, designing scalable database schemas in PostgreSQL and implementing efficient query optimisation for improved response times.

Collaborated with product and design teams through weekly sprints, contributing to roadmap discussions and taking ownership of features from conception through production deployment.

Mentored two junior developers on best practices for code quality, code review processes, and debugging techniques across full stack applications.

Senior Full Stack Developer

Nexus Digital Group Ltd

www.nexusdigitalgroup.com

London, United Kingdom

January 2021 - July 2022

Led development of a customer analytics dashboard using Vue.js and D3.js, handling real-time data visualisation for enterprise clients across financial services and retail sectors.

Designed and implemented microservices architecture using Node.js and Docker, reducing system latency by 40% and improving deployment frequency from monthly to weekly cycles.

Established CI/CD pipelines using GitHub Actions and automated testing frameworks, resulting in 35% reduction in production bugs and faster time-to-market for feature releases.

Oversaw code quality initiatives including implementation of ESLint standards, pre-commit hooks, and mandatory peer reviews, raising overall code coverage from 45% to 78%.

Junior Full Stack Developer

Spectrum Labs

spectrum-labs.net

Bristol, United Kingdom

March 2019 - December 2020

Built responsive web applications using React and Angular frameworks, delivering pixel-perfect implementations against design specifications for SaaS products.

Wrote backend services in Python and Node.js, managing databases in both SQL and NoSQL technologies including PostgreSQL and MongoDB for various client projects.

Utilised LangChain for natural language processing tasks and integrated third-party APIs to extend application functionality and improve user engagement features.

Participated in daily standups and sprint planning sessions, communicating technical constraints and progress updates to non-technical stakeholders and product managers.

EDUCATION

BSc Computer Science (2:1)

University of Bristol

Bristol, United Kingdom

Graduated June 2019

TECHNICAL SKILLS

Frontend: React, Vue.js, Angular, HTML5, CSS3, Tailwind CSS, Redux, TypeScript

Backend: Node.js, Express, Python, Django, REST APIs, GraphQL

Databases: PostgreSQL, MongoDB, MySQL, database design and optimisation

DevOps and Tools: Docker, Docker Compose, Git, GitLab CI, GitHub Actions, Linux

Testing: Jest, Mocha, Chai, unit testing, integration testing

Cloud Platforms: AWS (EC2, S3, RDS), basic Google Cloud Platform experience

Other: Agile methodologies, JIRA, API design and documentation
