## PROFESSIONAL SUMMARY

I am a Staff Data Analyst with 12 years of experience delivering data-driven insights across finance, retail, and telecommunications sectors. I have a genuine passion for turning complex datasets into actionable business intelligence, and I take pride in translating technical findings into recommendations that stakeholders can actually understand and act upon. My background spans from building dashboards and data pipelines to leading analytical projects that directly influenced strategic decisions. I'm someone who enjoys mentoring junior analysts and helping teams establish better data practices.

## TECHNICAL SKILLS

SQL (Advanced)

Python (Advanced)

R (Intermediate)

Tableau (Advanced)

Power BI (Advanced)

Excel (Advanced)

Apache Spark

Data warehousing and ETL processes

Statistical analysis

Kubernetes

Terraform

ArgoCD

Google Analytics

Looker

Data visualization

PostgreSQL

MySQL

MongoDB

## WORK EXPERIENCE

Senior Data Analyst

Insight Solutions Ltd

www.insightsolutions.co.net

Leeds, United Kingdom

November 2019 - September 2023

Developed and maintained 25+ Tableau dashboards used daily by the executive team to monitor KPIs across product lines, resulting in improved decision-making velocity.

Led a cross-functional project to migrate legacy reporting systems to a cloud-based data warehouse, reducing query times by 60% and enabling real-time analysis.

Conducted deep-dive analyses on customer churn patterns, identifying three key retention opportunities that generated an estimated GBP 1.2M in incremental revenue.

Mentored four junior analysts on SQL optimization, data storytelling techniques, and best practices for building maintainable analytical solutions.

Staff Data Analyst

Digital Metrics Group

www.digitalmetricsgroup.io

Manchester, United Kingdom

January 2021 - July 2022

Created automated weekly reporting frameworks using Python and SQL that eliminated 15 hours of manual spreadsheet work across the analytics team.

Partnered with the product team to design and analyze A/B tests on platform features, delivering statistical validation for three major product launches.

Built self-service data exploration tools in Looker that empowered non-technical stakeholders to answer their own analytical questions without analyst intervention.

Established data quality monitoring processes using SQL, identifying and correcting over 40 data integrity issues that were affecting downstream reporting.

Data Analyst

ClearView Analytics

www.clearviewanalytics.com

Leeds, United Kingdom

June 2011 - October 2019

Designed and deployed daily ETL pipelines using SQL and Python to consolidate data from 12 different source systems into a centralized reporting database.

Authored over 100 SQL queries to support ad-hoc business questions from stakeholders across finance, operations, and marketing departments.

Created statistical models to forecast quarterly revenue with 93% accuracy, which directly informed budget planning and resource allocation decisions.

Transitioned the finance reporting function from static Excel files to dynamic Tableau dashboards, improving accessibility and reducing errors by 45%.

## EDUCATION

BSc (Hons) Business Analytics

University of Manchester

Manchester, United Kingdom

Graduated: June 2011

## CERTIFICATIONS

Google Analytics Individual Qualification (IQ)

Tableau Desktop Specialist
