PROFESSIONAL SUMMARY

I'm a Full Stack Engineer with just over a year of professional experience building web applications using modern JavaScript frameworks and cloud technologies. I've worked on customer-facing features for B2B SaaS platforms and contributed to backend API development with Python and Node.js. I'm passionate about writing clean code and learning from experienced developers, and I'm particularly interested in how frontend and backend systems interact. Outside of work, I contribute to small open-source projects and spend time solving coding challenges on HackerRank.

WORK EXPERIENCE

Full Stack Developer

Vertex Digital Solutions

www.vertexdigitalsolutions.io

London, United Kingdom

June 2023 - Present

Built and maintained React components for a fintech dashboard, ensuring responsive design across all device sizes and improving initial load time by 30 percent through code splitting and lazy loading. Developed REST API endpoints using Express.js and Node.js to handle user authentication and transaction data retrieval, writing comprehensive unit tests with Jest to achieve 85 percent code coverage. Collaborated with product managers and designers in weekly sprints to clarify requirements and delivered features consistently within two-week sprint cycles. Participated in daily standups and code reviews, receiving constructive feedback from senior engineers on separation of concerns and error handling patterns.

Junior Software Engineer

CloudNine Analytics Ltd

www.cloudnineanalytics.co.net

Oxford, United Kingdom

March 2023 - May 2023

Created data visualization pages using React and D3.js to display real-time analytics for healthcare clients, translating wireframes and design mockups into functional components. Wrote Python scripts using Django ORM to process CSV uploads and validate data quality, creating automated workflows that reduced manual data entry by 40 percent. Debugged production issues using browser developer tools and server logs, identifying and fixing a critical bug that was preventing users from exporting reports. Assisted in refactoring legacy code and migrating components from class-based to functional components with React Hooks, improving code readability and maintainability.

Web Development Intern

Bright Interactive Ltd

www.brightinteractive.com

Oxford, United Kingdom

July 2022 - February 2023

Developed static pages and simple interactive features using HTML, CSS, and vanilla JavaScript for client websites across various industries including retail and professional services. Implemented responsive layouts using CSS Grid and Flexbox, ensuring designs matched specifications and worked correctly on mobile and desktop viewports. Assisted senior developers in building and testing WordPress theme customizations, learning how PHP templates work and how child themes override parent functionality. Maintained version control with Git, creating feature branches for each task, writing clear commit messages, and creating pull requests that were reviewed by team leads before merging to main.

EDUCATION

Bachelor of Science in Computer Science

University of Oxford

Oxford, United Kingdom

Graduated: July 2022

First Class Honours

SKILLS

Front End: React, HTML5, CSS3, JavaScript ES6+, Bootstrap, Material-UI, responsive design, DOM manipulation

Back End: Node.js, Express.js, Python, Django, REST APIs, SQL, PostgreSQL, MongoDB, authentication

Tools and Platforms: Git, GitHub, AWS S3, Docker, npm, webpack, Visual Studio Code, Postman, Jira, Linux command line

Advanced Technologies: Kubernetes, Terraform, ArgoCD, CI/CD pipelines, Infrastructure as Code

Other: Agile methodology, test-driven development, Unix systems, problem-solving, collaborative teamwork
