PROFESSIONAL SUMMARY

Full Stack Engineer with 5 years of experience building web applications and backend systems across fintech and e-commerce sectors. I work primarily with JavaScript, Python, and cloud platforms, focusing on writing clean, maintainable code and solving complex database problems. I've led feature development on projects handling millions of transactions and enjoy mentoring junior developers through code reviews and pair programming sessions.

WORK EXPERIENCE

Senior Full Stack Engineer

Creditwise Solutions (Previously known as TechFlow Digital)

Birmingham, United Kingdom

March 2023 - Present

www.creditwise.co.uk

Architected and deployed a microservices-based lending platform handling 50,000+ daily transactions using Node.js and PostgreSQL

Led migration of legacy monolithic application to React frontend with REST API backend, reducing page load times by 40%

Implemented Docker containerization and Kubernetes orchestration for the development and production environments

Mentored two junior developers through code reviews and pair programming, establishing team standards for TypeScript usage

Full Stack Developer

Vertex Solutions Ltd

Manchester, United Kingdom

June 2021 - February 2023

www.vertex-solutions.co.uk

Developed and maintained customer-facing web application using React and Express.js handling 100,000+ monthly active users

Optimized MongoDB database queries and implemented Redis caching layer, improving API response times from 800ms to 200ms

Collaborated with product and design teams to implement 15+ feature releases across 6-month cycles

Built automated testing suite using Jest and Cypress, achieving 78% code coverage across frontend components

Full Stack Developer

Nimbus Digital Solutions

Birmingham, United Kingdom

September 2019 - May 2021

nimbus-digital.io

Created e-commerce backend system using Python Django and PostgreSQL processing £2 million in annual transactions

Integrated third-party payment gateways including Stripe and PayPal with full error handling and reconciliation processes

Developed Angular-based admin dashboard for managing 5,000+ product SKUs and inventory tracking

Deployed applications to AWS infrastructure using EC2, RDS, and Lambda functions with infrastructure-as-code approach

EDUCATION

Bachelor of Science in Computer Science

University of Birmingham

Birmingham, United Kingdom

Graduated: June 2019

Grade: Upper Second Class (2:1)

TECHNICAL SKILLS

Frontend: React, Angular, HTML5, CSS3, JavaScript, TypeScript, Redux, Material-UI

Backend: Node.js, Express.js, Python, Django, RESTful APIs, GraphQL

Databases: PostgreSQL, MongoDB, Redis, MySQL

Cloud and DevOps: AWS (EC2, RDS, Lambda, S3), Docker, Kubernetes, CI/CD pipelines, Git, GitHub Actions

Tools and Other: Jest, Cypress, npm, webpack, Linux, Agile methodologies
