PROFESSIONAL SUMMARY

I'm a Business Intelligence Analyst with 4 years of experience building data solutions and dashboards for retail and financial services companies. I've spent most of my career moving between different analytical focuses, picking up various tools along the way. I enjoy working with SQL and Python to solve data problems, though my roles have kept me quite scattered across different technologies. I'm based in Liverpool and looking for a position where I can focus my skills more clearly rather than jumping around different systems every 18 months.

TECHNICAL SKILLS

Database Management: SQL Server, PostgreSQL, MySQL

BI Tools: Tableau, Power BI, Looker

Programming Languages: Python, R, VBA

Cloud Platforms: AWS, Google Cloud Platform

Advanced Technologies: Kubernetes, Terraform, Docker, ArgoCD

Data Warehousing: Snowflake, BigQuery

ETL Tools: Apache Airflow, Talend

Statistical Analysis: SPSS, SAS

Other: Excel, Git, Jira, Confluence

WORK EXPERIENCE

Director of Analytics Operations

DataVault Solutions

www.datavaultsolutions.io

Manchester, United Kingdom

August 2022 - Present

Directed a department of 48 analytics and business intelligence professionals across multiple regional offices, overseeing strategic initiatives and departmental budgets exceeding 3.2 million pounds annually. Implemented enterprise-wide governance frameworks that standardised reporting across 12 different business units and reduced data errors by 67 percent. Managed relationships with C-suite executives and presented quarterly insights to the board of directors on market trends and competitive positioning. Led the digital transformation project that migrated legacy reporting systems to a modern cloud-based analytics platform, completing 6 months ahead of schedule.

Senior BI Developer

Catalyst Analytics Ltd

www.catalystanalytics.co.uk

Liverpool, United Kingdom

March 2021 - July 2022

Developed interactive Tableau dashboards used by 200+ business users across sales, marketing, and operations departments to monitor KPIs and identify revenue opportunities. Built Python scripts to automate weekly ETL processes that extracted data from 8 different source systems, reducing manual data preparation time from 12 hours to 45 minutes. Collaborated with product managers and stakeholders to gather requirements and delivered 15+ self-service reporting solutions that improved decision-making speed by an average of 35 percent. Mentored two junior analysts on SQL optimisation techniques and best practices in dimensional modelling, resulting in improved query performance across the analytics platform.

Junior Data Analyst

Insight Metrics Group

www.insightmetrics.io

Liverpool, United Kingdom

June 2020 - February 2021

Created SQL queries to extract and transform raw transactional data from the production database, supporting ad-hoc analysis requests from business stakeholders across finance and marketing teams. Assisted in the design and deployment of a Power BI dashboard that tracked customer acquisition costs and lifetime value metrics for senior management review. Performed exploratory data analysis on customer behaviour datasets using Excel and basic Python scripts to identify patterns and validate hypotheses proposed by the marketing department. Documented data lineage and business logic for 6 key metrics used across the organisation to ensure consistency in reporting and reduce discrepancies between different reporting tools.

EDUCATION

BSc Business Analytics

University of Manchester

Manchester, United Kingdom

Graduated: June 2020

PROFESSIONAL CERTIFICATIONS

Tableau Desktop Specialist

Issued: January 2022
