PROFESSIONAL SUMMARY

Software Engineer with two years of commercial experience building web applications and APIs using Python and JavaScript. I've worked across the full stack on several projects, from database design to frontend interfaces. I'm genuinely interested in writing clean, maintainable code and understanding how systems work at scale. Currently based in Birmingham and looking to deepen my expertise in backend architecture.

WORK EXPERIENCE

Software Engineer

Vertex Digital Solutions

Birmingham, United Kingdom

vertexdigital.io

March 2023 - Present

Developed and maintained RESTful APIs using Python Flask framework, serving approximately 50,000 daily active users across multiple client applications.

Implemented automated testing suite using pytest, achieving 78% code coverage and reducing production bugs by approximately 35%.

Collaborated with frontend team to design and document API specifications, reducing integration time and improving development efficiency.

Participated in code reviews and contributed to architectural decisions for migrating legacy monolithic application to microservices.

Junior Backend Developer

Cascade Systems Ltd

Solihull, United Kingdom

cascadesystems.co.net

September 2022 - February 2023

Built and deployed PostgreSQL database schemas for new customer management platform, supporting data storage for 200+ active clients.

Wrote Python scripts to automate manual data migration processes, reducing migration time from 8 hours to 45 minutes per client.

Debugged and fixed critical issues in production environment, responding to alerts within agreed SLA times.

Assisted senior developer in implementing JWT authentication system for secure API access across internal services.

Junior Full Stack Developer

Experian

Birmingham, United Kingdom

experian.com

July 2021 - August 2022

Developed React components for customer-facing dashboard, implementing features for credit report visualization and identity verification flows.

Created unit tests and integration tests using Jest and React Testing Library to ensure component reliability.

Worked with backend team to integrate frontend with Java microservices, troubleshooting API issues and database queries.

Contributed to documentation and participated in knowledge-sharing sessions with wider development team across 12-person squad.

EDUCATION

BSc Computer Science

Aston University

Birmingham, United Kingdom

Graduated: June 2021

Grade: Upper Second Class Honours (2:1)

SKILLS

Programming Languages: Python, JavaScript, SQL, Java

Frontend: React, HTML5, CSS3, Bootstrap

Backend: Flask, Django REST Framework, Node.js

Databases: PostgreSQL, MySQL, MongoDB

Tools and Platforms: Git, Docker, AWS EC2, Linux

Testing: pytest, Jest, React Testing Library

Other: RESTful API design, Agile/Scrum methodology, Windows and Linux

GITHUB REPOSITORIES

github.com/jamespalmer92/weather-dashboard - React application displaying real-time weather data using OpenWeather API

github.com/jamespalmer92/task-management-api - Flask REST API with PostgreSQL backend for task and project management

github.com/jamespalmer92/python-web-scraper - Python scripts for web scraping and data processing using BeautifulSoup and Requests

github.com/jamespalmer92/expense-tracker - Full stack JavaScript application with Node.js backend and React frontend for personal finance tracking
