PROFESSIONAL SUMMARY

I'm a Full Stack Engineer with 8 years of experience building web applications and cloud infrastructure. I started my career at a small fintech startup where I wore many hats, then moved into increasingly specialised roles. I enjoy mentoring junior developers and have a strong track record of delivering projects on time. I'm passionate about clean code and performance optimisation, though I'm still learning new frameworks every few months.

WORK EXPERIENCE

Principal Architect, Zenith Solutions

zenithsolutions.io | Birmingham, United Kingdom

March 2023 - Present

Architected and led the design of a microservices platform serving 2 million daily active users across multiple cloud regions

Directed the infrastructure overhaul that reduced deployment time from 45 minutes to 8 minutes, improving team velocity by 62%

Managed a distributed team of 34 engineers across three continents, setting technical roadmaps and ensuring alignment with business objectives

Implemented advanced monitoring and alerting systems resulting in 99.98% uptime across production environments

Junior Software Engineer, DataFlow Technologies

dataflow.co.uk | Coventry, United Kingdom

July 2021 - February 2023

Built REST APIs using Node.js and Express for internal data processing pipelines handling millions of records daily

Developed frontend components in React that improved user engagement metrics by 31% within the first quarter

Collaborated with product team to implement real-time data visualisation dashboards using D3.js

Maintained and optimised PostgreSQL databases, reducing query times by 45% through strategic indexing

Senior Full Stack Developer, Catalyst Digital

catalyst-digital.net | Birmingham, United Kingdom

August 2016 - June 2021

Designed and implemented full-stack e-commerce platform using Vue.js frontend and Python Django backend, processing over 10,000 transactions monthly

Led refactoring of legacy codebase resulting in 40% reduction in technical debt and improved system reliability

Mentored 5 junior developers through code reviews and pair programming sessions, with 3 progressing to mid-level positions

Deployed applications to AWS using CloudFormation and managed CI/CD pipelines with Jenkins and GitLab

EDUCATION

Bachelor of Science in Computer Science

University of Birmingham | Birmingham, United Kingdom

Graduated June 2016

Final Grade: 2:1 (Upper Second Class Honours)

TECHNICAL SKILLS

Backend Technologies: Node.js, Python, Django, Java, PostgreSQL, MongoDB, Redis

Frontend Technologies: React, Vue.js, Angular, HTML5, CSS3, JavaScript, TypeScript

Cloud Platforms: AWS, Google Cloud Platform, Azure

DevOps and Infrastructure: Docker, Kubernetes, Terraform, ArgoCD, Jenkins, GitLab CI, CloudFormation

Databases: PostgreSQL, MySQL, MongoDB, DynamoDB, Elasticsearch

Additional Skills: RESTful API Design, GraphQL, Microservices Architecture, Test-Driven Development, Agile Methodologies
