PROFESSIONAL SUMMARY

Experienced DevOps Engineer with 5 years of hands-on experience designing and maintaining cloud infrastructure and CI/CD pipelines. I've worked across AWS and Kubernetes environments, helping teams move from manual deployments to fully automated infrastructure. I'm comfortable with Linux systems administration, containerisation, and infrastructure-as-code tooling. I enjoy problem-solving under pressure and have a track record of improving system reliability and reducing deployment times significantly.

WORK EXPERIENCE

Senior DevOps Engineer

Vertex Solutions Ltd

www.vertexsolutions.io

London, United Kingdom

January 2021 - Present

Architected and deployed Kubernetes clusters supporting 50+ microservices across multiple environments with 99.9% uptime

Implemented comprehensive monitoring and alerting using Prometheus and Grafana, reducing mean time to resolution by 40%

Developed Terraform modules for infrastructure provisioning, enabling teams to deploy new environments in under 30 minutes

Mentored 2 junior DevOps engineers on container orchestration best practices and troubleshooting methodologies

DevOps Engineer

CloudForge Systems (Previously known as TechStream Infrastructure Co)

www.cloudforge-systems.com

Birmingham, United Kingdom

March 2021 - December 2023

Established CI/CD pipelines using Jenkins and GitLab CI, reducing deployment frequency from weekly to daily releases

Managed AWS infrastructure including EC2, RDS, S3, and Lambda functions supporting 8 production applications

Implemented infrastructure-as-code using Terraform and CloudFormation, reducing manual configuration errors by 85%

Led migration of legacy applications from on-premise servers to AWS, completing project 2 weeks ahead of schedule

Infrastructure Engineer

NexGen Dynamics

www.nexgendynamics.net

Bristol, United Kingdom

July 2019 - February 2021

Deployed and maintained Docker containers in production environments, standardising application deployment across teams

Automated server provisioning and configuration management using Ansible, reducing setup time from 4 hours to 15 minutes

Supported on-call rotation for critical infrastructure incidents, maintaining average response time of 8 minutes

Collaborated with developers to troubleshoot performance issues and optimise application resource utilisation

EDUCATION

University of Birmingham

Bachelor of Science in Computer Science

Graduated: June 2019

Birmingham, United Kingdom

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, RDS, S3, Lambda, CloudWatch), Google Cloud Platform

Container Technologies: Docker, Kubernetes, Docker Compose

Infrastructure as Code: Terraform, CloudFormation, Ansible

CI/CD Tools: Jenkins, GitLab CI, GitHub Actions

Monitoring and Logging: Prometheus, Grafana, ELK Stack, CloudWatch

Scripting Languages: Bash, Python, PowerShell

Version Control: Git, GitHub, GitLab

Operating Systems: Linux (Ubuntu, CentOS, Amazon Linux), Windows Server

Databases: PostgreSQL, MySQL, MongoDB basics

Other Tools: Nginx, Apache, Vault, Helm
