PROFESSIONAL SUMMARY

Senior Forward Deployed Engineer with 6 years of experience architecting and deploying enterprise infrastructure solutions for organisations across financial services and technology sectors. Passionate about solving complex deployment challenges in austere environments and building resilient systems that work reliably when connectivity is limited. Known for getting hands dirty alongside field teams, translating technical requirements into practical implementations, and mentoring junior engineers through challenging projects. Based in Glasgow, always keen to travel for critical deployments.

WORK EXPERIENCE

Senior Forward Deployed Engineer

Apex Systems Ltd

www.apex-systems.co.uk

London, United Kingdom

August 2022 - Present

Led deployment of containerised applications across 12 geographically dispersed sites, managing infrastructure provisioning and post-deployment support for clients in high-security environments. Designed and implemented automated configuration management using Ansible and custom Python scripts to reduce manual deployment time by 65 percent. Architected multi-site monitoring and logging infrastructure using ELK stack, enabling real-time alerting across all deployed systems. Mentored team of 4 junior engineers on forward deployment methodologies and troubleshooting procedures for production incidents.

Forward Deployed Systems Engineer

Nexus Deployment Solutions

nexusdeply.io

Glasgow, United Kingdom

March 2021 - July 2022

Managed end-to-end deployment lifecycle for bespoke enterprise solutions across 8 client locations including remote rural sites with limited network infrastructure. Developed bash and Python automation scripts that reduced deployment time from 3 weeks to 5 days per location, eliminating 90 percent of manual configuration errors. Built custom monitoring dashboards using Grafana to track application health and infrastructure metrics across distributed environments. Implemented disaster recovery procedures and conducted failover testing at 4 separate customer sites, achieving 99.8 percent system availability targets.

Deployment Engineer

TechVault Infrastructure Group

tecvault-infra.net

Edinburgh, United Kingdom

January 2021 - February 2023

Performed infrastructure assessments and deployed Linux-based solutions for mid-market organisations transitioning to cloud-native architectures. Created comprehensive deployment documentation and runbooks that reduced onboarding time for new team members by 40 percent. Collaborated with security teams to implement hardening procedures and ensure compliance with industry standards across all deployed systems. Provided on-site technical support and training to client IT teams during critical deployment phases lasting 2-6 weeks per engagement.

EDUCATION

BSc Computer Systems and Networks

University of Glasgow

Glasgow, United Kingdom

Graduated June 2018

TECHNICAL SKILLS

Infrastructure and Deployment: Linux system administration, bash scripting, Python automation, Docker, infrastructure as code, configuration management, cloud deployment

Containerisation and Orchestration: Docker, Kubernetes, container registry management, ArgoCD, helm charts

Infrastructure as Code: Terraform, CloudFormation, Ansible, Vagrant

Monitoring and Observability: ELK stack, Grafana, Prometheus, Splunk, log aggregation, performance monitoring

Cloud Platforms: AWS, Azure, Google Cloud Platform, hybrid cloud deployment

Networking: TCP/IP, DNS, VPN configuration, firewalls, network troubleshooting

CI/CD Pipelines: GitLab CI, GitHub Actions, Jenkins, automated deployment pipelines

Version Control: Git, GitHub, GitLab

Databases: PostgreSQL, MongoDB, MySQL administration

Operating Systems: Ubuntu, CentOS, Red Hat Enterprise Linux, Windows Server

Security: SSL/TLS implementation, secrets management, user access controls, security hardening
