PROFESSIONAL SUMMARY

I'm a junior full stack engineer based in Liverpool with two years of professional experience building web applications. I started my career wanting to understand how systems work end-to-end, so I've focused on learning both backend and frontend technologies. I'm comfortable working with JavaScript across the stack and have built several projects from scratch. I'm looking to deepen my knowledge and take on more complex architectural challenges in my next role.

TECHNICAL SKILLS

Languages: JavaScript, Python, HTML, CSS, SQL

Frontend: React, Vue.js, CSS Flexbox, Responsive Design

Backend: Node.js, Express.js, Django, RESTful APIs

Databases: PostgreSQL, MongoDB, MySQL

Tools and Platforms: Git, GitHub, Docker, VS Code, Postman, Figma

Cloud Services: AWS S3, Heroku

DevOps: Kubernetes, Terraform, ArgoCD, CI/CD Pipelines

Other: Jest (testing), Webpack, NPM, Linux basics

WORK EXPERIENCE

Junior Full Stack Developer

TechVision Solutions Ltd

www.techvisionsolutions.io

Liverpool, United Kingdom

March 2023 - Present

Developed and maintained five React-based frontend applications serving internal business workflows and customer-facing portals

Built RESTful APIs using Node.js and Express.js that handled authentication, user management, and data processing for microservices architecture

Collaborated with senior developers and product managers to translate requirements into technical specifications and implemented features across the full technology stack

Implemented automated testing using Jest for both frontend components and backend endpoints, achieving 70% code coverage on critical modules

Web Developer

Digital Canvas Agency

www.digitalcanvas.co.uk

Manchester, United Kingdom

September 2022 - February 2023

Created responsive websites using HTML, CSS, and JavaScript for 12 client projects ranging from small business sites to e-commerce platforms

Debugged and optimized existing PHP and jQuery applications, reducing page load times by an average of 35%

Worked with the design team to implement pixel-perfect layouts from Figma mockups while ensuring cross-browser compatibility

Managed version control using Git and GitHub, coordinating with three other developers on shared codebases through pull requests and code reviews

Support Engineer to Developer (Apprenticeship)

NetCore Innovations

www.netcore.net

Liverpool, United Kingdom

July 2021 - August 2022

Transitioned from technical support to development through a structured apprenticeship program, contributing to bug fixes and feature development in a Django-based admin dashboard

Learned full stack development fundamentals, working on Python backend logic and Vue.js frontend interfaces handling customer data management

Responded to production issues and implemented hotfixes in both frontend and backend systems, maintaining 99.2% application uptime

Documented internal APIs and created onboarding resources for new team members, reducing training time by two weeks

EDUCATION

Bachelor of Science in Computer Science

University of Liverpool

Liverpool, United Kingdom

2018 - 2021

Grade: Upper Second Class Honours (2:1)

Relevant Coursework: Web Development, Database Design, Software Engineering Principles, Object-Oriented Programming, Data Structures

PUBLIC REPOSITORIES

github.com/jamesharrison92/expense-tracker-app - Full stack expense management application built with React and Node.js, featuring user authentication and monthly reporting

github.com/jamesharrison92/weather-dashboard - Weather dashboard using React and OpenWeatherMap API with location-based forecasting and responsive mobile design

github.com/jamesharrison92/blog-platform - Blogging platform built with Vue.js frontend and Django REST Framework backend, includes user authentication and markdown support

github.com/jamesharrison92/portfolio-site - Personal portfolio website showcasing projects and blog posts, built with static site generation and deployed on Vercel
