PROFESSIONAL SUMMARY

I'm a data analyst with six years of hands-on experience turning raw data into actionable insights for business teams. I've spent the last three years leading analytics projects at mid-sized tech companies, mentoring junior analysts, and building dashboards that stakeholders actually use. I'm comfortable working with large datasets and Python, and I have a genuine interest in understanding what the numbers mean before presenting them to anyone.

WORK EXPERIENCE

Senior Data Analyst

DataFlow Solutions

www.dataflowsolutions.io

Manchester, United Kingdom

March 2022 - Present

Led the analytics function for a team of two junior analysts, establishing best practices for data validation and reporting across 15+ internal projects.

Designed and maintained 12 automated dashboards using Tableau and SQL that reduced manual reporting time by 8 hours per week across the business.

Conducted statistical analysis on customer behaviour datasets containing 2.3 million records, identifying three key segments that improved email campaign performance by 31%.

Collaborated with engineering and product teams to define data collection requirements and implement tracking for four new product features.

Data Analyst

Insight Analytics Ltd

www.insightanalytics.net

Manchester, United Kingdom

January 2020 - February 2022

Developed 20+ ad-hoc analyses using Python and SQL to support strategic decisions across marketing, sales, and operations teams.

Built a customer retention prediction model using logistic regression that flagged at-risk accounts with 78% accuracy, enabling proactive outreach.

Managed the ETL pipeline for three data sources, resolving data quality issues that had caused reporting delays and inconsistencies.

Created monthly business reviews with visualisations and commentary for C-level stakeholders, presenting findings to audiences of 30+ people.

Junior Data Analyst

North West Analytics Group

Manchester, United Kingdom

June 2018 - December 2019

Performed exploratory data analysis on sales and operational datasets to identify trends and anomalies using Excel and SQL.

Supported the senior analyst in building Tableau reports and dashboards used by 50+ internal users across five departments.

Cleaned and prepared datasets from disparate sources, ensuring data accuracy before analysis and presentation.

Assisted with ad-hoc reporting requests and provided data support to marketing and finance teams on 25+ projects.

EDUCATION

BSc Business Analytics

University of Manchester

Manchester, United Kingdom

Graduated June 2018

TECHNICAL SKILLS

Languages and Tools: Python, SQL, R, Excel

Data Visualisation: Tableau, Power BI

Databases: PostgreSQL, MySQL, SQL Server

Statistical Methods: Regression analysis, hypothesis testing, time series analysis, segmentation

Other: ETL processes, data cleaning, Google Analytics, Looker, Git basics
