PROFESSIONAL SUMMARY

Full Stack Engineer with 12 years of hands-on experience building scalable web applications and leading technical teams in fast-paced environments. I've spent the last decade working across the entire stack, from optimizing PostgreSQL queries to architecting React frontends, and I genuinely enjoy mentoring junior developers through real-world problems. I'm based in Oxford and looking for roles where I can contribute strategic technical decisions while staying connected to actual code.

WORK EXPERIENCE

Senior Full Stack Engineer

TechVenture Labs

techventure.io

London, United Kingdom

March 2021 - Present

Led the architectural redesign of our core platform, migrating from a monolithic Node.js application to microservices deployed on Kubernetes, reducing API response times by 65 percent.

Mentored a team of 4 junior and mid-level engineers, establishing code review practices and conducting weekly technical workshops on system design and performance optimization.

Implemented comprehensive monitoring and alerting infrastructure using Prometheus and Grafana, enabling the team to reduce incident response time from 2 hours to 15 minutes on average.

Designed and delivered a real-time data streaming pipeline using Apache Kafka to handle 50,000 events per second, supporting new analytics features for our largest enterprise customers.

Full Stack Engineer

DataPoint Solutions

www.datapointsolutions.com

Oxford, United Kingdom

August 2017 - February 2021

Built and maintained multiple customer-facing web applications using React, Node.js, and PostgreSQL, delivering features that improved user engagement by 40 percent across 15 active clients.

Optimized database query performance and implemented caching strategies with Redis, cutting average response times from 800ms to 120ms for data-heavy dashboard pages.

Developed automated testing suites achieving 82 percent code coverage, which significantly reduced production defects and gave the team confidence to deploy multiple times per week.

Collaborated with product managers and UX designers to translate business requirements into technical specifications, shipping 6 major feature releases that were adopted by 90 percent of active users.

Junior to Mid-Level Full Stack Developer

DigitalCore Systems

digitalcore.net

Birmingham, United Kingdom

June 2012 - July 2017

Contributed to the development of internal tools and customer-facing applications using Python, Django, and AngularJS, working on features used by over 200 employees daily.

Participated in the migration of legacy code from PHP to modern Node.js stack, ensuring zero downtime during the transition and training team members on new development practices.

Implemented RESTful APIs and worked with AWS services including EC2, RDS, and S3 to support infrastructure scaling as the user base grew from 5,000 to 50,000 active accounts.

Maintained on-call rotation for production systems, responding to alerts and implementing fixes, building a strong understanding of how systems behave under real-world load and failure conditions.

EDUCATION

BSc Computer Science

University of Oxford

Oxford, United Kingdom

2008 - 2012

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL, HTML, CSS

Frontend: React, Redux, Next.js, AngularJS, CSS-in-JS, Webpack

Backend: Node.js, Express, Django, REST APIs, GraphQL

Databases: PostgreSQL, MongoDB, Redis, MySQL

Infrastructure and DevOps: AWS, Docker, Kubernetes, Terraform, Nginx

Tools and Platforms: Git, Linux, GitHub Actions, Jenkins, Prometheus, Grafana, Apache Kafka

Methodologies: Agile, Test-Driven Development, Code Review, Microservices Architecture
