PROFESSIONAL SUMMARY

Full Stack Engineer with 5 years of experience building scalable web applications and APIs. I've spent the last few years moving between startups and established companies, picking up React and Node.js along the way while also getting comfortable with cloud infrastructure. I enjoy the variety of working across the entire stack and have developed a particular interest in performance optimization and database design. Currently looking for a role where I can contribute to meaningful projects while mentoring junior developers.

WORK EXPERIENCE

Senior Full Stack Engineer

CloudSync Solutions

cloudsyncsolutions.io

London, United Kingdom

March 2022 - Present

Developed and maintained 12+ microservices handling 2 million daily API requests using Node.js and Express, achieving 99.8% uptime across production environments.

Migrated legacy monolithic application to React frontend with TypeScript, reducing bundle size by 40% and improving page load times from 4.2s to 1.8s.

Implemented comprehensive testing suite with Jest and Cypress, increasing code coverage from 52% to 87% and reducing production bugs by 35% over six months.

Mentored three junior developers through code reviews and pair programming sessions, contributing to their progression from junior to mid-level engineers.

Full Stack Developer

Digital Compass Ltd

digitalcompass.co.net

London, United Kingdom

July 2020 - February 2022

Built customer-facing dashboard using React and Redux for managing real estate portfolios, supporting 50,000+ active users across the platform.

Designed and implemented PostgreSQL database schema for event tracking system, optimizing queries to handle peak loads of 50,000 events per minute.

Contributed to CI/CD pipeline improvements using GitHub Actions and Docker, reducing deployment time from 45 minutes to 12 minutes.

Participated in sprint planning and technical discussions, often taking lead on architectural decisions for new features affecting 15-person engineering team.

Junior Full Stack Developer

TechStart Innovations

techstart-innovations.io

London, United Kingdom

September 2019 - June 2020

Developed REST APIs using Python Flask and JavaScript, creating endpoints for mobile and web applications serving 100,000+ monthly active users.

Fixed bugs and implemented feature requests in existing React applications, learning best practices through code review feedback from senior engineers.

Assisted with database optimization tasks, including indexing strategies and query refactoring that improved average response times by 25%.

Supported deployment processes and basic server maintenance on AWS EC2 instances, gaining foundational knowledge of cloud infrastructure and DevOps practices.

EDUCATION

BSc Computer Science

University of Manchester

Manchester, United Kingdom

2015 - 2019

TECHNICAL SKILLS

Languages: JavaScript, Python, TypeScript, SQL, HTML, CSS

Frontend: React, Redux, Next.js, Vue.js, Tailwind CSS, Material-UI

Backend: Node.js, Express, Flask, Django, RESTful APIs

Databases: PostgreSQL, MongoDB, MySQL, Redis

Cloud and DevOps: AWS (EC2, S3, Lambda, RDS), Docker, GitHub Actions, Heroku, DigitalOcean

Testing: Jest, Cypress, Pytest, Mocha

Tools and Platforms: Git, Linux, Webpack, Figma, Jira, PostgreSQL, Datadog

Other: Microservices architecture, GraphQL, Web performance optimization, API design
