PROFESSIONAL SUMMARY

Full Stack Engineer with 10 years of experience building scalable web applications and distributed systems. I've spent the last six years leading backend architecture decisions while maintaining hands-on involvement in frontend development. I enjoy mentoring junior developers and have a particular interest in optimising database performance and improving deployment pipelines. Currently based in Manchester and looking for roles where I can contribute to both technical strategy and implementation.

TECHNICAL SKILLS

Backend: Python, Java, Go, Node.js, PostgreSQL, MongoDB

Frontend: React, Vue.js, TypeScript, HTML5, CSS3

Cloud & Infrastructure: AWS, Docker, Kubernetes, Terraform

Databases: PostgreSQL, Redis, Elasticsearch, DynamoDB

Tools & Practices: Git, CI/CD pipelines, microservices architecture, REST APIs, GraphQL

Other: Apache Kafka, RabbitMQ, Nginx, Linux administration

WORK EXPERIENCE

Senior Full Stack Engineer

Quantum Labs

www.quantumlabs.io

Manchester, UK

June 2021 - Present

Led the architecture and development of a real-time data processing platform handling 50 million events daily across multiple services. Designed and implemented a GraphQL API layer that reduced client-side data fetching by 40 percent and improved frontend performance significantly. Mentored a team of four junior developers, conducting code reviews and establishing best practices for API design and testing standards. Migrated legacy monolithic application to microservices using Docker and Kubernetes, reducing deployment time from 45 minutes to 8 minutes.

Full Stack Engineer

Vertex Solutions Ltd

www.vertexsolutions.co

Manchester, UK

February 2018 - May 2021

Developed and maintained a customer-facing SaaS platform built with React and Node.js, serving over 200 enterprise clients across financial services. Built comprehensive test suites achieving 85 percent code coverage and implemented automated testing in CI/CD pipelines using Jenkins and GitLab CI. Optimised PostgreSQL queries and implemented Redis caching layer, reducing API response times by 60 percent during peak usage. Collaborated with product and design teams to translate requirements into technical specifications and delivered

features on time for quarterly releases.

Junior Full Stack Developer

Digital Forge Ltd

www.digitalforge.net

Leeds, UK

August 2014 - January 2018

Built interactive web applications using jQuery and Angular for various clients in retail and hospitality sectors. Worked with Python Django framework to develop backend services and RESTful APIs for mobile applications. Participated in agile ceremonies including daily standups and sprint planning, taking ownership of assigned tickets and delivering them to acceptance criteria. Assisted in infrastructure maintenance tasks including server configuration, database backups, and monitoring application performance metrics.

EDUCATION

Bachelor of Science in Computer Science

University of Manchester

Manchester, UK

Graduated: June 2014

CERTIFICATIONS

AWS Solutions Architect Associate

Issued: March 2020

Kubernetes Application Developer

Issued: September 2022
