PROFESSIONAL SUMMARY

I'm a data scientist with 7 years of experience building predictive models and extracting actionable insights from complex datasets. I've worked across fintech, retail, and healthcare sectors, leading projects that drove measurable business impact. I enjoy mentoring junior team members and have a particular interest in time series forecasting and customer segmentation. When I'm not working with data, I'm usually tinkering with side projects in Python or reading about advances in machine learning.

WORK EXPERIENCE

Senior Data Scientist

DataCore Analytics Ltd

www.datacore-analytics.co.uk

Leeds, United Kingdom

January 2022 - Present

Developed and deployed a customer churn prediction model that identified at-risk accounts with 87% accuracy, resulting in retention of GBP 2.3 million in annual revenue. Led a team of 2 junior data scientists on 4 concurrent projects, providing code reviews and establishing best practices for reproducibility. Architected an automated data pipeline using Python and SQL that reduced monthly reporting time from 40 hours to 6 hours. Collaborated with marketing and product teams to design experiments and analyse A/B test results for feature rollouts.

Data Scientist

Vertex Finance Solutions

www.vertexfinance.io

Manchester, United Kingdom

June 2019 - December 2021

Built machine learning models for credit risk assessment that improved loan approval accuracy by 12% while reducing false positives. Maintained and optimised a portfolio of 8 production models using scikit-learn, XGBoost, and TensorFlow, monitoring model drift and retraining schedules. Created interactive dashboards in Tableau and Power BI to communicate findings to stakeholders without technical backgrounds. Conducted exploratory data analysis on transaction datasets containing 50 million records to identify patterns in customer behaviour.

Data Analyst

InsightCore Ltd

www.insightcore.net

Birmingham, United Kingdom

August 2017 - May 2019

Performed statistical analysis on customer survey data using Python and R to support business decisions across product and operations teams. Built ETL processes to consolidate data from multiple sources including APIs, databases, and CSV files. Generated weekly performance reports using SQL queries against a 2 terabyte data warehouse. Collaborated with engineering teams to implement data quality checks and validation rules at the source level.

EDUCATION

MSc Data Science

University of Edinburgh

Edinburgh, United Kingdom

2015 - 2017

BSc Mathematics

University of Leeds

Leeds, United Kingdom

2011 - 2015

TECHNICAL SKILLS

Languages: Python, SQL, R, Scala

Machine Learning: scikit-learn, TensorFlow, XGBoost, LightGBM, ensemble methods

Data Analysis: Pandas, NumPy, statistical hypothesis testing, A/B testing

Visualisation: Tableau, Power BI, Matplotlib, Seaborn, Plotly

Big Data: PySpark, Hadoop, basic Apache Airflow

Databases: PostgreSQL, MySQL, MongoDB, Snowflake

Cloud Platforms: AWS (S3, SageMaker, EC2), Google Cloud Platform (BigQuery)

Version Control: Git, GitHub

Other: Jupyter Notebooks, Linux, Docker basics

CERTIFICATIONS

AWS Certified Machine Learning Specialty

Amazon Web Services

Issued December 2021
