PROFESSIONAL SUMMARY

Forward Deployed Engineer with 1 year of hands-on experience supporting field operations and customer environments. I started my career troubleshooting infrastructure issues in the field and have developed a solid foundation in Linux systems, networking basics, and infrastructure automation. I'm keen on building deployable solutions that actually work in remote locations rather than just in datacentres.

WORK EXPERIENCE

Forward Deployed Engineer

Nexus Solutions Ltd

nexus-solutions.io

London, United Kingdom

June 2023 - Present

Deployed and configured containerized applications across 8 customer sites in Scotland and Northern England, ensuring systems remained operational with minimal on-site support.

Troubleshot networking and Linux kernel issues in field environments, reducing mean time to resolution from 4 hours to 1.5 hours through systematic diagnostic approaches.

Automated repetitive configuration tasks using Bash scripts and Ansible playbooks, saving approximately 6 hours per deployment cycle.

Documented deployment procedures and created runbooks for customers, enabling their teams to handle basic maintenance without escalation.

Junior Infrastructure Technician

TechCore Services

techcore-services.co.uk

Glasgow, United Kingdom

February 2023 - May 2023

Assisted senior engineers with Linux server provisioning and initial configuration for client environments across 15 small business accounts.

Monitored server health and performed log analysis to identify and report performance bottlenecks and security concerns to the technical team.

Supported migration of 6 customer environments from legacy systems to Ubuntu-based infrastructure with zero downtime.

Maintained detailed records of system configurations and changes, creating an internal knowledge base used by the wider team.

IT Support Technician

Glasgow City Council

glasgow.gov.uk

Glasgow, United Kingdom

August 2022 - January 2023

Provided first-line technical support to 200+ council staff members, resolving hardware, software and network connectivity issues.

Processed and resolved 800+ support tickets, achieving 92% first-contact resolution rate for common issues.

Collaborated with network administrators to document current infrastructure setup and identify opportunities for improvement.

Installed and configured end-user devices including laptops and printers across multiple council buildings.

EDUCATION

BSc Computing Science

University of Edinburgh

Edinburgh, United Kingdom

Graduated: June 2022

SKILLS

Linux Administration: Ubuntu, CentOS, basic kernel troubleshooting

Infrastructure as Code: Ansible, Bash scripting, YAML configuration

Networking: TCP/IP fundamentals, DNS, DHCP, basic firewall configuration

Containerization: Docker, docker-compose, basic Kubernetes concepts

Cloud Platforms: AWS EC2 and S3 basics, DigitalOcean

Monitoring and Logging: Prometheus, basic ELK stack experience

Version Control: Git, GitHub

Databases: MySQL basics, PostgreSQL basics

Deployment Tools: Terraform fundamentals, Jenkins basics

NOTABLE PUBLIC REPOSITORIES

github.com/jamesmitchell92/ansible-deployment-suite

Ansible playbooks for automated deployment of multi-tier applications across remote servers. Includes roles for Nginx, PostgreSQL and application containerization.

github.com/jamesmitchell92/linux-hardening-scripts

Collection of Bash scripts for hardening Ubuntu and CentOS systems. Covers SSH configuration, firewall rules and user access controls.

github.com/jamesmitchell92/field-diagnostics-tool

Python-based CLI tool for gathering system diagnostics in remote environments. Captures network, storage and compute metrics for troubleshooting.

github.com/jamesmitchell92/docker-compose-templates

Pre-configured docker-compose templates for common application stacks used during field deployments.
