PROFESSIONAL SUMMARY

Data analyst with 8 years of experience building reporting infrastructure and extracting insights from complex datasets across financial services and retail sectors. I've worked with cross-functional teams to solve real business problems, from reducing warehouse costs by identifying inefficiencies to flagging fraud patterns that saved companies significant losses. I'm comfortable with SQL, Python, and cloud platforms, and I genuinely enjoy the detective work involved in finding what the numbers are actually telling us.

WORK EXPERIENCE

Senior Data Analyst

Vertex Analytics Ltd

Manchester, United Kingdom

www.vertexanalytics.io

June 2021 - Present

Designed and maintained 15+ automated reporting dashboards for C-suite executives, reducing manual reporting time from 40 hours per week to 3 hours using Tableau and SQL Server.

Built predictive models using Python and scikit-learn to forecast customer churn, achieving 87% accuracy and enabling targeted retention campaigns that improved customer lifetime value by 12%.

Led data quality audits across 8 data warehouses, documenting and remediating over 200 data integrity issues that had been causing downstream reporting errors.

Mentored 3 junior analysts on SQL optimization and statistical analysis methods, with 2 subsequently promoted to mid-level positions.

Data Analyst

FinanceFlow Solutions

Manchester, United Kingdom

www.financeflow.co

March 2018 - May 2021

Developed ETL processes using Python and Apache Airflow to ingest and transform daily data from 12 banking APIs, serving 50+ internal stakeholders.

Investigated transaction anomalies and suspicious account patterns, flagging high-risk cases that led to recovery of GBP 340,000 in fraudulent transactions.

Created ad-hoc analyses for product management team on user behaviour patterns, directly informing feature prioritization decisions that increased product adoption by 18%.

Documented SQL best practices guide adopted company-wide, resulting in 25% improvement in query performance across the analytics team.

Data Analyst

Retail Insights Group

Leeds, United Kingdom

www.retailinsights.net

September 2015 - February 2018

Analyzed warehouse operations data to identify cost reduction opportunities, leading to supply chain recommendations that saved GBP 520,000 annually.

Produced weekly and monthly KPI reports tracking store performance, inventory levels, and sales trends for 120+ retail locations across the UK.

Worked with marketing team to analyze campaign effectiveness using A/B testing frameworks, improving email campaign conversion rates from 2.1% to 3.7%.

Supported IT and operations teams with SQL queries and data exports, building relationships that informed feature requests for new business intelligence tools.

EDUCATION

Bachelor of Science in Mathematics

University of Manchester

Manchester, United Kingdom

Graduated June 2015
