PROFESSIONAL SUMMARY

I'm a data analyst with seven years of experience building dashboards and reports that actually get used by business teams rather than gathering dust. I've worked across finance and retail sectors, leading projects where I've had to push back on poorly defined requirements and deliver something that makes sense. I'm comfortable with SQL and Python but honestly spend more time thinking about what questions people should be asking than writing complex code.

WORK EXPERIENCE

Senior BI Analyst

DataVault Solutions

datavault-solutions.io

Manchester, United Kingdom

March 2022 - Present

Designed and implemented a customer behaviour analytics platform using Tableau that reduced reporting time from 40 hours weekly to 4 hours, directly supporting the commercial team's pricing strategy decisions.

Migrated 15 legacy reports from Excel to SQL Server and Power BI, establishing a single source of truth for financial metrics across three business units and eliminating version control issues.

Led the data quality improvement initiative by identifying and documenting data inconsistencies in the warehouse, working with engineering to resolve root causes in upstream systems and improving data accuracy to 98.5%.

Mentored two junior analysts on SQL query optimization and dashboard design principles, with both successfully leading their own reporting projects within 12 months.

BI Developer

Insight Analytics Ltd

Manchester, United Kingdom

July 2019 - February 2022

Built 25+ interactive dashboards in Tableau and Power BI serving executive leadership, finance, and operations teams, with monthly usage averaging 800 active users across the platform.

Wrote complex SQL queries and stored procedures to extract and transform data from Oracle databases, supporting ad-hoc analysis requests and reducing turnaround time for business questions from weeks to days.

Collaborated with stakeholders to translate business requirements into technical specifications, conducting sessions with 15+ different departments to understand their reporting needs and pain points.

Established data governance documentation and refresh schedules for 40 critical reports, reducing failures and ensuring stakeholders received accurate data on time.

Business Analyst

RetailMetrics Group

retailmetrics.net

Manchester, United Kingdom

June 2017 - June 2019

Developed weekly sales and inventory dashboards in QlikView that tracked KPIs across 120 retail locations, enabling regional managers to identify performance trends and make faster decisions.

Performed data analysis on customer transaction patterns using Python and SQL, identifying seasonal trends that informed stock procurement decisions and reduced excess inventory by 18%.

Supported system implementations by gathering requirements from store managers and head office teams, translating feedback into priority fixes and feature requests for the IT development team.

Documented 30+ business processes and created data dictionaries for the reporting team, establishing standards that were adopted across all future analytics projects.

EDUCATION

BSc Computer Science

University of Manchester

Manchester, United Kingdom

Graduated: June 2017

Grade: Upper Second Class Honours

TECHNICAL SKILLS

Data Warehousing and Analytics: SQL Server, Oracle, Snowflake, Data warehouse design and maintenance

Business Intelligence Tools: Tableau, Power BI, QlikView

Programming Languages: Python, VBA

Database Management: T-SQL, stored procedures, query optimization, indexing strategies

Data Visualization: Dashboard design, report building, visual analytics

Other: Excel advanced functions, Git version control, requirements gathering, Agile methodologies
