PROFESSIONAL SUMMARY

I'm a hands-on DevOps engineer with 5 years of experience building and maintaining cloud infrastructure across AWS and GCP. I've spent the last three years helping early-stage fintech companies scale their systems from prototype to production, working closely with backend teams to automate deployments and reduce mean time to recovery. I enjoy solving infrastructure problems with code and take pride in making operations transparent and predictable rather than mysterious.

TECHNICAL SKILLS

Cloud Platforms: AWS, GCP, Azure

Container Technologies: Docker, Kubernetes, ECS

Infrastructure as Code: Terraform, CloudFormation, Ansible

CI/CD Pipelines: Jenkins, GitLab CI, GitHub Actions

Monitoring and Logging: Prometheus, Grafana, ELK Stack, Datadog

Programming Languages: Python, Bash, Go

Databases: PostgreSQL, Redis, DynamoDB

Version Control: Git, GitLab, GitHub

Operating Systems: Linux, macOS

WORK EXPERIENCE

Senior DevOps Engineer

FinScale Technologies, Cambridge, United Kingdom

www.finscale.io

January 2022 - Present

Designed and implemented a multi-region Kubernetes cluster across AWS that reduced deployment time from 45 minutes to 8 minutes and improved system availability to 99.95%.

Built a comprehensive monitoring stack using Prometheus and Grafana, creating 40+ custom dashboards that helped the team identify performance issues before customers noticed.

Developed Python automation scripts that reduced manual infrastructure provisioning by 15 hours per week across database migrations and environment setup.

Mentored two junior engineers on Terraform best practices and Kubernetes troubleshooting, conducting weekly pair programming sessions that improved code quality and knowledge sharing.

DevOps Engineer

Northpoint Solutions Ltd, Cambridge, United Kingdom

www.northpoint-solutions.co.uk

June 2020 - December 2021

Migrated the company's on-premises infrastructure to AWS EC2 and RDS, handling the cutover for 8 microservices with zero downtime and saving 40% on annual infrastructure costs.

Implemented GitLab CI/CD pipelines for 12 development teams, standardizing deployment processes and reducing human error related incidents by 70%.

Established infrastructure-as-code practices using Terraform, managing 200+ cloud resources across development, staging and production environments.

Responded to critical production incidents and maintained on-call rotation, achieving an average resolution time of 18 minutes for P1 issues.

Junior DevOps Engineer

CloudBridge Systems, Cambridge, United Kingdom

www.cloudbridge-systems.net

September 2019 - May 2020

Assisted in maintaining 50+ Docker containers running on AWS ECS, handling updates, patches and capacity monitoring across production workloads.

Wrote Bash and Python scripts for automated log analysis and reporting, processing 2TB of application logs daily to identify errors and performance bottlenecks.

Collaborated with security team to implement IAM policies and VPC configurations, reducing unauthorized access attempts by 85%.

Documented infrastructure architecture and runbooks, creating knowledge base articles that reduced on-call escalations to senior staff by 30%.

EDUCATION

Bachelor of Science in Computer Science

University of Manchester, Manchester, United Kingdom

Graduated: June 2019

Grade: 2:1 Upper Second Class Honours

CERTIFICATIONS

AWS Certified Solutions Architect Associate

Kubernetes Application Developer Certification (CKAD)
