PROFESSIONAL SUMMARY

Backend engineer with 2 years of experience building and maintaining REST APIs and microservices. I've spent most of my career working with Python and Node.js, focusing on database optimization and system reliability. I enjoy solving problems that involve scaling applications and collaborating with frontend teams to design clean APIs. Outside of work, I contribute to open source projects and I'm currently learning Go.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, TypeScript

Frameworks and Libraries: Django, Flask, Express.js, FastAPI

Databases: PostgreSQL, MongoDB, Redis

Tools and Platforms: Docker, AWS, Git, Linux, Postman

Other: REST APIs, microservices architecture, CI/CD pipelines, unit testing

WORK EXPERIENCE

Backend Engineer

TechVenture Solutions Ltd

Manchester, United Kingdom

www.techventuresolutions.co.uk

January 2023 - Present

Developed and maintained 5 REST APIs serving 15+ microservices using Python and Django, handling approximately 50,000 requests daily.

Optimized PostgreSQL queries for data retrieval operations, reducing average response times by 35% across the user authentication service.

Implemented automated testing suite with pytest covering 82% of codebase, reducing production bugs by 40% over six months.

Collaborated with frontend developers to design and document API specifications, ensuring seamless integration with React-based applications.

Junior Backend Developer

CloudFirst Digital

Manchester, United Kingdom

www.cloudfirstdigital.io

June 2022 - December 2022

Built backend services using Node.js and Express.js for a real-time data analytics platform, supporting 200+ concurrent users.

Designed and implemented MongoDB schema for customer event tracking system, improving data retrieval speed by 28%.

Deployed applications to AWS EC2 instances and managed environment configuration using Docker containers.

Participated in code reviews and contributed improvements to documentation, helping onboard 2 new junior developers.

Junior Software Developer

Digital Forge Ltd

Manchester, United Kingdom

www.digitalforge.net

August 2021 - May 2022

Contributed to backend maintenance for an e-commerce platform using Python Flask, handling order processing and payment integrations.

Created database migration scripts using SQLAlchemy ORM, managing schema updates across development and production environments.

Troubleshot production issues and implemented fixes, maintaining 99.2% uptime for critical payment services.

Assisted senior developers in refactoring legacy code and implemented unit tests for 4 key modules.

EDUCATION

BSc Computer Science

University of Manchester

Manchester, United Kingdom

Graduated: June 2021

GITHUB REPOSITORIES

python-task-scheduler

Task scheduling library with retry logic and persistence, 156 stars, built with Python and Redis.

express-auth-middleware

Authentication middleware for Express.js applications with JWT support and role-based access control, 89 stars.

postgres-migration-tool

CLI tool for managing PostgreSQL schema migrations safely in production environments, 124 stars.

python-api-cache

Lightweight caching decorator for Python APIs to reduce database queries, 67 stars.
