PROFESSIONAL SUMMARY

I'm a full stack engineer with 10 years of experience building scalable web applications and leading technical teams in fast-paced environments. I've spent the last several years working on microservices architectures and modernizing legacy systems at scale. I enjoy mentoring junior developers and helping teams make better architectural decisions. I'm based in London and typically work with React, Node.js, and cloud infrastructure.

CORE SKILLS

Backend Development: Node.js, Python, Java, PostgreSQL, MongoDB, Redis

Frontend Development: React, TypeScript, Vue.js, HTML5, CSS3

Cloud and DevOps: AWS, Docker, Kubernetes, GitHub Actions, Terraform

Databases: PostgreSQL, MySQL, MongoDB, Elasticsearch

Other Technologies: GraphQL, REST APIs, Message Queues (RabbitMQ), Microservices Architecture

WORK EXPERIENCE

Staff Full Stack Engineer

Velocity Systems Ltd (velocity-systems.io)

London, United Kingdom

August 2022 - Present

Architected and led the migration of monolithic application to microservices, reducing deployment time by 65% and improving system reliability to 99.95% uptime

Established engineering standards and code review practices across a team of 12 engineers, resulting in 40% reduction in production bugs

Designed and implemented real-time data processing pipeline using Node.js and Kubernetes handling 500K events per minute for analytics platform

Mentored 4 junior developers, with 2 progressing to mid-level roles within 18 months

Senior Full Stack Engineer

DataFlow Technologies (dataflow-tech.co)

London, United Kingdom

March 2019 - July 2022

Developed and maintained core platform serving 2M+ active users, built with React, Node.js, and PostgreSQL handling 10K concurrent connections

Implemented CI/CD pipeline using GitHub Actions and Terraform, reducing manual deployment steps by 90% and enabling 50+ deployments per week

Led integration of Elasticsearch for search functionality across product, improving query performance from 2 seconds to 200ms for large datasets

Owned full stack development of customer reporting module generating 15M reports monthly, collaborating with product and design teams

Mid-Level Full Stack Engineer

Nexus Digital Ltd (nexus-digital.net)

London, United Kingdom

June 2017 - February 2019

Built responsive web application using React and Redux serving 100K users, maintaining 98% Lighthouse performance score

Developed REST APIs in Python using Django framework with comprehensive test coverage exceeding 85%

Collaborated with DevOps team to containerize applications using Docker and deploy to AWS ECS, reducing infrastructure costs by 30%

Participated in on-call rotation and maintained SLA of 99.9% uptime for production systems

EDUCATION

BSc Computer Science

University of Manchester

Manchester, United Kingdom

Graduated: June 2014

ADDITIONAL INFORMATION

Certifications: AWS Solutions Architect Associate (2020), Certified Kubernetes Administrator (2021)

Languages: English (Native), French (Conversational)
