PROFESSIONAL SUMMARY

Frontend engineer with 12 years of experience building scalable web applications for high-traffic platforms. Specialise in React and TypeScript, with a strong background in performance optimisation and mentoring junior developers. Have led frontend architecture decisions at multiple companies and enjoy solving complex problems around state management and component design. Based in Liverpool and actively contributing to open source projects.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML5, CSS3, Python

Frontend Frameworks: React, Next.js, Vue.js, Angular

State Management: Redux, Zustand, MobX, Context API

Build Tools: Webpack, Vite, Babel, ESLint, Prettier

Testing: Jest, React Testing Library, Cypress, Playwright

Performance: Web Vitals optimisation, lazy loading, code splitting, bundle analysis

Version Control: Git, GitHub, GitLab, Bitbucket

CSS: Styled Components, Tailwind CSS, SASS, CSS Modules

APIs: REST, GraphQL, WebSockets

Developer Tools: Chrome DevTools, VS Code, Figma

WORK EXPERIENCE

Staff Frontend Engineer

Luminix Digital Ltd

www.luminix.io

Liverpool, United Kingdom

March 2021 - Present

Architected and implemented a new micro frontend system enabling 8 teams to deploy independently, reducing deployment time by 40 percent and eliminating cross-team merge conflicts.

Led the migration of a legacy Angular application to Next.js and TypeScript, improving page load times from 4.2 seconds to 1.8 seconds and increasing Lighthouse score from 58 to 94.

Mentored 4 junior developers, conducting weekly code reviews and establishing frontend best practices that improved code quality metrics by 35 percent across the team.

Introduced automated performance testing into the CI pipeline using Lighthouse CI and custom Web Vitals tracking, catching regressions before production and reducing performance-related bugs by 60 percent.

Senior Frontend Engineer

Vertex Commerce Solutions

www.vertexcommerce.co.uk

Manchester, United Kingdom

August 2017 - February 2021

Designed and built a real-time order tracking dashboard using React and WebSockets, handling 50000 concurrent users during peak periods with no performance degradation.

Refactored the payment checkout flow, reducing form abandonment by 28 percent through UX improvements and optimising bundle size by 45 percent through code splitting and lazy loading.

Established a component library with 60 reusable components, resulting in 30 percent faster feature development across 3 product teams and consistent design implementation.

Championed accessibility standards, implementing WCAG 2.1 AA compliance across all customer-facing interfaces and training the team on inclusive design practices.

Frontend Engineer

Pixel Studios Ltd

www.pixelstudios.net

Liverpool, United Kingdom

June 2012 - July 2017

Built responsive web applications for 15 different clients using HTML5, CSS3 and jQuery, meeting all deadlines and maintaining a 98 percent client satisfaction rating.

Implemented a custom CSS framework and JavaScript utilities that reduced average project setup time from 2 weeks to 3 days, allowing the agency to take on more projects.

Migrated the agency's primary product from jQuery to React, creating a modern foundation that enabled new features and improved code maintainability for future development.

Collaborated with UX designers and backend developers to translate Figma mockups into pixel-perfect implementations, ensuring seamless integration with REST APIs.

EDUCATION

BSc Computer Science

University of Manchester

Manchester, United Kingdom

2008 - 2012

OPEN SOURCE CONTRIBUTIONS

React Form Validator - https://github.com/jamesharrison-dev/react-form-validator

A TypeScript library for complex form validation with async support and custom rule composition.

Next.js SEO Toolkit - https://github.com/jamesharrison-dev/nextjs-seo-toolkit

Opinionated toolkit for implementing Open Graph, JSON-LD structured data and dynamic sitemap generation in Next.js applications.

Performance Monitor - https://github.com/jamesharrison-dev/performance-monitor

Browser library for tracking Core Web Vitals and custom metrics with real-time dashboard integration.

CSS Reset Pro - https://github.com/jamesharrison-dev/css-reset-pro

Lightweight CSS normalisation framework used by over 5000 developers with 2.3k GitHub stars.
