PROFESSIONAL SUMMARY

I'm a Software Engineer with 3 years of experience building web applications and backend systems. I started my career writing Python scripts for data processing and have progressed to designing full-stack solutions. I enjoy solving complex problems and learning new technologies on the job. I'm particularly interested in improving application performance and writing clean, maintainable code.

WORK EXPERIENCE

Software Engineer

TechVenture Solutions

techventure.io

Leeds, United Kingdom

January 2023 - Present

Developed and maintained 5 microservices using Python and FastAPI that process 2 million requests monthly for e-commerce clients

Reduced database query times by 40% through query optimization and implementing Redis caching layers

Collaborated with frontend team to design REST APIs and documented endpoints using OpenAPI specifications

Led code reviews for junior developers and established linting standards that caught 30% more issues during development

Mid-Level Backend Developer

DataFlow Systems

dataflow.co

Manchester, United Kingdom

July 2021 - December 2022

Built ETL pipelines using Python that automated data migration from legacy systems, saving 15 hours per week of manual work

Implemented unit and integration tests achieving 78% code coverage across critical modules

Troubleshot production incidents and implemented monitoring alerts using CloudWatch that reduced incident detection time by 50%

Refactored monolithic Django application to separate API layer, improving deployment frequency from monthly to weekly

Junior Software Engineer

Digital Horizons Ltd

www.digitalhorizons.co.uk

Leeds, United Kingdom

June 2020 - June 2021

Contributed to building customer-facing features in a React and Node.js web application used by 50,000 active users

Fixed 200+ bugs reported by QA team and implemented automated regression testing to prevent recurrence

Participated in sprint planning and technical design sessions, providing input on architecture decisions

Learned Git workflow, CI/CD pipelines, and Agile methodology while mentored by senior developers

EDUCATION

Bachelor of Science in Computer Science

University of Leeds

Leeds, United Kingdom

2016 - 2020

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, Bash

Frameworks and Libraries: FastAPI, Django, Flask, React, Node.js

Databases: PostgreSQL, MySQL, MongoDB, Redis

Tools and Platforms: Git, Docker, AWS (EC2, S3, RDS), Jenkins, Jira, Linux

Other: REST APIs, Unit Testing, Data Structures, System Design basics
