PROFESSIONAL SUMMARY

I'm a data analyst with 10 years of experience building analytics solutions and mentoring junior team members across financial services and tech sectors. I've spent the last 4 years in staff-level roles where I focus on architecture decisions and process improvements rather than day-to-day reporting. I work best when I'm designing systems that scale and solving problems that require digging into messy data sources.

WORK EXPERIENCE

Senior Data Analyst

DataVault Solutions, Bristol, United Kingdom

www.datavault.io

January 2022 - Present

Designed and implemented a new data warehouse architecture supporting 15+ analytical teams and reducing query times by 60 percent through optimised table structures and partitioning strategies. Led the migration of legacy reporting systems to cloud-based Snowflake environment, managing stakeholder expectations and ensuring zero downtime during transition. Mentored 4 junior analysts on SQL optimization and data modelling best practices, with 2 promoted to mid-level positions within 18 months. Established data quality frameworks and automated validation checks that reduced erroneous reports by 85 percent and saved the business approximately 40 hours per month in manual corrections.

Data Analyst - Financial Services

Morrison Capital Partners, London, United Kingdom

www.morrisoncapital.co.uk

March 2019 - December 2021

Built automated daily reporting dashboards in Tableau connecting to multiple source systems, providing real-time visibility to portfolio managers and reducing manual report generation time from 4 hours to 15 minutes. Developed Python scripts to extract and transform transaction data from banking APIs and legacy systems, processing 2 million records daily with 99.8 percent accuracy. Investigated data discrepancies between trading systems and reconciliation systems, identifying root causes and implementing fixes that recovered 3.2 million pounds in unreconciled transactions. Documented analytical processes and created training materials for 8 new team members joining the analytics department.

Analyst

Insight Data Group, Bristol, United Kingdom

www.insightdatagroup.net

June 2014 - February 2019

Created ad hoc analyses and regular reports for stakeholders across marketing, operations, and finance using SQL and Excel, supporting decision-making on pricing strategy and customer segmentation. Performed exploratory data analysis on customer behaviour datasets to identify patterns, which informed product development roadmap and led to a new feature generating 1.2 million pounds in first-year revenue. Maintained and updated existing reporting infrastructure built on Microsoft SQL Server, ensuring 99.5 percent uptime and troubleshooting performance issues. Built proficiency in statistical analysis and A/B testing methodologies,

delivering 15+ hypothesis tests for marketing campaigns with average uplift of 12 percent.

EDUCATION

Bachelor of Science in Mathematics with Statistics

University of Bristol, Bristol, United Kingdom

Graduated: June 2014

SKILLS

Technical Skills:

SQL, Python, R, Tableau, Power BI, Snowflake, AWS, Google BigQuery, Apache Spark, Microsoft SQL Server, Excel (advanced), Git, Linux command line, Data modelling, ETL processes

Domain Knowledge:

Financial services, Business intelligence, Data warehousing, Reporting architecture, Performance optimization, Data quality assurance, Statistical analysis, A/B testing, Customer analytics
