PROFESSIONAL SUMMARY

I'm a junior data analyst with one year of professional experience working with SQL, Python, and Power BI to help businesses make better decisions from their data. I enjoy turning raw data into insights that actually matter to people making real decisions. I'm particularly interested in learning more about statistical analysis and building automated reporting solutions. I'm looking for opportunities where I can grow my technical skills while contributing meaningfully to a team.

TECHNICAL SKILLS

Databases: SQL, MySQL, PostgreSQL

Programming: Python (Pandas, NumPy), Basic R

Visualisation: Power BI, Tableau, Excel (Advanced)

Other: Google Analytics, Git, Data Cleaning, Spreadsheet Modelling

WORK EXPERIENCE

Data Analyst

DataViz Solutions Ltd

www.dataviz-solutions.co

Birmingham, United Kingdom

June 2023 - Present

Wrote SQL queries daily to extract sales and customer data from MySQL databases for 15+ stakeholders across the business

Built 8 Power BI dashboards tracking KPIs for different departments, reducing manual reporting time by 6 hours per week

Cleaned and transformed messy datasets using Python and Pandas, identifying and fixing data quality issues that were affecting reports

Documented all processes and dashboards to help junior team members get up to speed faster

Junior Data Analyst

Insight Analytics Hub

www.insightanalytics.io

Birmingham, United Kingdom

March 2023 - May 2023

Analysed customer behaviour data to identify trends in purchasing patterns across three product categories

Created 12 Excel dashboards with pivot tables and charts for the marketing team to track campaign performance

Assisted senior analysts with data validation and quality checks before reports were sent to clients

Conducted basic exploratory data analysis on new datasets to determine which metrics should be tracked

Data Intern

TechCore Consultancy

www.techcore.net

Birmingham, United Kingdom

September 2022 - February 2023

Supported data preparation tasks by cleaning and organising raw datasets for analysis in SQL and Excel

Created simple visualisations and charts to support weekly team meetings and client presentations

Learned best practices for data documentation and version control using Git

Worked on small projects involving basic statistical analysis and data profiling

EDUCATION

University of Birmingham

Bachelor of Science in Mathematics with Data Science

Graduated: June 2022

Grade: 2:1

PROJECTS AND REPOSITORIES

Customer Churn Analysis

github.com/jrichardson92/customer-churn-analysis

Python analysis of customer behaviour patterns using Pandas and Matplotlib, predicting which customers might leave a subscription service

Sales Dashboard Automation

github.com/jrichardson92/sales-dashboard-automation

Python script that extracts data from a CSV file and generates automated Power BI compatible reports monthly

Data Cleaning Toolkit

github.com/jrichardson92/data-cleaning-toolkit

Collection of Python functions and documentation for common data cleaning tasks like handling missing values and removing duplicates

CERTIFICATIONS AND COURSES

Google Analytics Individual Qualification (IQ) - Completed March 2023

Introduction to Data Analysis with Python - DataCamp - Completed August 2022
