PROFESSIONAL SUMMARY

Data analyst with 2 years of hands-on experience building dashboards and analysing customer behaviour datasets. I've spent most of my time in fast-paced startups where I learned to move quickly between SQL queries, Python scripts, and Tableau visualisations. I enjoy finding patterns in messy data and presenting findings in ways that actually make sense to stakeholders. Currently looking to deepen my analytical skills while working on more complex datasets.

WORK EXPERIENCE

Junior Data Analyst

DataFlow Solutions

dataflowsolutions.io

Cambridge, United Kingdom

March 2023 - Present

Created and maintained 15+ Tableau dashboards tracking key performance metrics for 8 different client accounts

Wrote SQL queries to extract and transform data from PostgreSQL databases, reducing manual reporting time by 4 hours per week

Collaborated with the product team to analyse user behaviour data and identified a feature usage pattern that led to a 12% improvement in customer retention

Built Python scripts to automate weekly data validation checks, catching data quality issues before they reached stakeholders

Data Analyst (Intern converted to Full-time)

TechInsight Analytics

techinsight.co

Cambridge, United Kingdom

June 2022 - February 2023

Assisted in designing and implementing a customer segmentation model using Python pandas and scikit-learn that grouped 50,000+ customers into 5 distinct personas

Cleaned and prepared raw data from multiple sources including APIs and CSV exports, achieving 98% data completeness

Presented monthly analytics reports to C-level executives with visualisations highlighting trends in marketing campaign performance

Documented data processes and created a shared knowledge base that reduced onboarding time for new team members by 3 weeks

Business Analyst Support

Cambridge Insights Ltd

cambridge-insights.net

Cambridge, United Kingdom

September 2021 - May 2022

Supported senior analysts by gathering requirements from business stakeholders and translating them into technical specifications

Performed exploratory data analysis on customer datasets using Excel pivot tables and basic SQL queries

Tested and validated new data pipelines before deployment to production environments

Created documentation for recurring reports and maintained a spreadsheet-based data dictionary used across the department

EDUCATION

BSc Mathematics with Statistics

University of Cambridge

Cambridge, United Kingdom

Graduated June 2021

TECHNICAL SKILLS

SQL - PostgreSQL, writing complex queries with joins, subqueries, and window functions

Python - pandas, NumPy, scikit-learn, Matplotlib for data manipulation and basic machine learning

Data Visualisation - Tableau, creating interactive dashboards and static reports

Microsoft Excel - advanced formulas, pivot tables, VLOOKUP, data cleaning

Statistics - hypothesis testing, correlation analysis, A/B testing fundamentals

Version Control - Git, basic GitHub workflow

Databases - relational database concepts, schema design

Other - Google Analytics, Looker basics, CSV handling, JSON parsing

CERTIFICATIONS

Google Data Analytics Professional Certificate

Completed February 2022
