PROFESSIONAL SUMMARY

Senior frontend engineer with seven years of experience building user-centric web applications across fintech and e-commerce sectors. I've led frontend teams through large-scale migrations, mentored junior developers, and consistently delivered high-performance interfaces that improved user engagement by measurable margins. I'm particularly drawn to solving complex state management problems and creating accessible component systems that scale across multiple products.

WORK EXPERIENCE

Senior Frontend Engineer

Velocity Digital

www.velocitydigital.io

London, United Kingdom

March 2022 - Present

Led the complete frontend architecture rebuild for our core investment platform, reducing initial load time from 8.3s to 2.1s through code splitting and lazy loading strategies. Established and maintained a comprehensive component library with Storybook that 12 developers now use daily, increasing development velocity by 35 percent. Conducted technical interviews and onboarded four junior developers, providing regular code reviews and pair programming sessions to accelerate their growth. Implemented automated accessibility testing across all features, achieving WCAG 2.1 AA compliance and reducing accessibility issues by 78 percent.

Frontend Engineer

Nexus Financial Services

www.nexusfinance.co

London, United Kingdom

July 2019 - February 2022

Built and maintained customer-facing dashboard used by over 50,000 active users, handling real-time portfolio data updates with WebSocket connections and React state management. Migrated legacy jQuery codebase to React with TypeScript, introducing type safety that caught approximately 40 percent more bugs before production. Optimized application bundle size by 42 percent through tree-shaking, dynamic imports, and dependency auditing, resulting in faster page loads across all user segments. Championed implementation of end-to-end testing using Cypress, reducing regression bugs by 56 percent and improving release confidence.

Junior to Mid-Level Frontend Developer

Digital Canvas Studios

www.digitalcanvas.net

London, United Kingdom

September 2017 - June 2019

Developed responsive web interfaces for boutique advertising agency clients using HTML5, CSS3, and vanilla JavaScript, delivering pixel-perfect designs across desktop, tablet, and mobile devices. Introduced React to the project workflow and migrated two major client sites from jQuery to React, improving maintainability and developer experience. Collaborated with UX designers and backend developers to implement real-time analytics dashboards that tracked campaign performance metrics. Participated in daily standups and bi-weekly retrospectives, helping establish development best practices and code quality standards.

EDUCATION

Bachelor of Science in Computer Science

University of Manchester

Manchester, United Kingdom

Graduated: June 2017

SKILLS

Frontend Frameworks and Libraries: React, Vue.js, Next.js, Remix

Programming Languages: JavaScript, TypeScript, HTML5, CSS3, SCSS

State Management: Redux, Zustand, Context API, React Query

Testing: Jest, React Testing Library, Cypress, Playwright, Vitest

Build Tools and Bundlers: Webpack, Vite, Babel, esbuild

Accessibility: WCAG 2.1, ARIA, axe DevTools, Lighthouse

Performance Optimization: Core Web Vitals, code splitting, lazy loading, image optimization

Version Control: Git, GitHub, GitLab, Bitbucket

Development Practices: Agile, scrum, pair programming, code reviews, CI/CD

Additional Tools: Figma, Storybook, ESLint, Prettier, Vercel, Netlify
