PROFESSIONAL SUMMARY

Backend engineer with five years of experience building scalable APIs and microservices for fintech and SaaS companies. Comfortable working across the full stack but most interested in solving backend architecture problems, database design, and system reliability. I've led small technical initiatives from planning through deployment and enjoy mentoring junior developers. Looking for roles where I can take ownership of systems and contribute to technical decisions.

WORK EXPERIENCE

Senior Backend Engineer

TechVault Solutions

techvault.io

Cambridge, United Kingdom

March 2023 - Present

Designed and implemented a new payment processing service handling 500k transactions daily, reducing latency by 35% through query optimization and Redis caching layer.

Led migration of monolithic order service into three independent microservices, improving deployment frequency from monthly to weekly cycles.

Established code review standards and automated testing practices that increased test coverage from 42% to 78% across the backend team.

Mentored two junior developers on system design principles and helped them ship their first major features to production.

Backend Engineer

CloudMetrics Ltd

cloudmetrics.co

London, United Kingdom

June 2021 - February 2023

Built and maintained RESTful APIs serving 2 million daily active users, handling authentication, rate limiting, and complex business logic.

Implemented comprehensive logging and monitoring using ELK stack and Datadog, enabling faster incident response times from 45 minutes to 12 minutes.

Optimized PostgreSQL queries for reporting service, reducing average query time from 8 seconds to 1.2 seconds for end users.

Contributed to infrastructure decisions including Docker containerization and Kubernetes deployment strategies.

Junior Backend Engineer

DataStream Technologies

datastream.net

Cambridge, United Kingdom

July 2019 - May 2021

Developed backend services in Python and Node.js for a real-time data analytics platform serving enterprise clients.

Fixed production bugs and performance issues while maintaining 99.8% system uptime across all services.

Wrote database migrations and schema designs for new features, working closely with the database administrator.

Participated in sprint planning and attended client calls to clarify requirements for backend implementation.

EDUCATION

Bachelor of Science in Computer Science

University of Cambridge

Cambridge, United Kingdom

2015 - 2019

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL, Bash

Frameworks and Libraries: Django, FastAPI, Express.js, Node.js

Databases: PostgreSQL, MongoDB, Redis

Cloud and Infrastructure: AWS (EC2, RDS, S3), Docker, Kubernetes, Linux

Tools and Platforms: Git, REST APIs, Nginx, Apache, Grafana

Methodologies: Agile, Microservices Architecture, API Design, Database Optimization
