PROFESSIONAL SUMMARY

I'm a Full Stack Engineer with 3 years of hands-on experience building web applications using modern JavaScript frameworks and backend systems. I've worked across multiple startups in Manchester developing features from database design through to frontend deployment. I enjoy solving practical problems and take pride in writing code that other developers can maintain without frustration.

WORK EXPERIENCE

Senior Full Stack Developer

TechFlow Solutions

techflow.io

Manchester, United Kingdom

March 2023 - Present

Developed and maintained 5 microservices handling customer billing and subscription management using Node.js and Express, serving over 50,000 active users across the platform.

Built responsive React interfaces for an analytics dashboard that reduced customer support queries by 35% through improved data visualization and filtering capabilities.

Implemented automated testing pipelines using Jest and Cypress, increasing code coverage from 32% to 78% across the production codebase over 8 months.

Mentored 2 junior developers on REST API design principles and code review standards, leading to measurable improvements in their pull request quality and delivery timelines.

Full Stack Developer

DataVine Ltd

datavine.co.net

Manchester, United Kingdom

August 2021 - February 2023

Created full-stack features for a data visualization platform using React, Redux, and PostgreSQL, enabling clients to process and display datasets containing up to 500MB of records.

Redesigned the authentication system from token-based to JWT with refresh token rotation, resolving 23 reported security vulnerabilities in the previous implementation.

Optimized database queries and added strategic indexing, reducing average API response times from 2.8 seconds to 340 milliseconds for report generation endpoints.

Deployed application updates to staging and production environments using Docker and AWS ECS, establishing deployment documentation that reduced onboarding time for new team members by 40%.

Junior Full Stack Developer

Bright Pixel Studios

brightpixel.io

Manchester, United Kingdom

June 2020 - July 2021

Built frontend components using React and Vue.js for client projects including e-commerce platforms and content management systems, working across 4 separate client engagements.

Developed backend APIs and database schemas using Python Django and MySQL, delivering features for real-time notification systems and user authentication workflows.

Participated in daily standups and sprint planning meetings, contributing to 6 successful 2-week sprint cycles with consistent on-time feature delivery and minimal bug regression.

Assisted with debugging production issues and provided technical support to clients, maintaining 95% first-contact resolution rate for reported frontend and API problems.

EDUCATION

Bachelor of Science in Computer Science

University of Manchester

Manchester, United Kingdom

2017 - 2020

TECHNICAL SKILLS

Languages: JavaScript, Python, SQL, HTML5, CSS3

Frontend: React, Redux, Vue.js, Bootstrap, Tailwind CSS

Backend: Node.js, Express, Django, REST APIs

Databases: PostgreSQL, MySQL, MongoDB

DevOps and Tools: Docker, AWS EC2, AWS RCS, Git, GitHub, Jira, Linux

Testing: Jest, Cypress, Unittest, Postman
