PROFESSIONAL SUMMARY

I'm a Senior DevOps Engineer with 7 years of hands-on experience building and maintaining cloud infrastructure at scale. I've spent the last three years focusing on containerisation, infrastructure automation, and reducing deployment friction for engineering teams across multiple organisations. I enjoy solving problems that sit between development and operations, and I'm particularly interested in making infrastructure reproducible and observable.

WORK EXPERIENCE

Senior DevOps Engineer

TechVenture Solutions

www.techventure.io

London, United Kingdom

March 2022 - Present

Designed and implemented a multi-region Kubernetes cluster infrastructure serving 15 microservices, reducing deployment time from 45 minutes to 8 minutes

Built a comprehensive observability stack using Prometheus, Grafana, and ELK that reduced mean time to incident resolution by 60%

Established Infrastructure as Code practices across the organisation using Terraform, managing over 200 cloud resources across AWS and GCP

Mentored 3 junior engineers on containerisation best practices and Kubernetes operations, contributing to their promotions within 18 months

DevOps Engineer

DataFlow Systems

www.dataflowsystems.co.uk

London, United Kingdom

July 2019 - February 2022

Migrated legacy applications from on-premise infrastructure to AWS, cutting monthly infrastructure costs by 35% while improving system reliability

Implemented CI/CD pipelines using Jenkins and GitLab CI for 12 development teams, enabling them to deploy to production multiple times per day

Automated database backup and disaster recovery procedures, achieving a Recovery Time Objective of 2 hours and Recovery Point Objective of 15 minutes

Improved infrastructure security posture by implementing VPC isolation, security group policies, and regular vulnerability scanning across all environments

DevOps Engineer

NextGen Analytics

www.nextgen-analytics.net

London, United Kingdom

January 2017 - June 2019

Managed AWS infrastructure supporting 2 million daily active users, maintaining 99.8% uptime across production environments

Created comprehensive Terraform modules for infrastructure provisioning, reducing environment setup time from 3 days to 2 hours

Implemented log aggregation and alerting using CloudWatch and PagerDuty, reducing incident response time by 45%

Documented operational runbooks and disaster recovery procedures, enabling on-call engineers to resolve issues 40% faster

EDUCATION

Bachelor of Science in Computer Science

University of Manchester

Manchester, United Kingdom

Graduated June 2016

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, S3, RDS, Lambda, VPC), Google Cloud Platform, DigitalOcean

Containerisation: Docker, Kubernetes, Helm

Infrastructure as Code: Terraform, CloudFormation, Ansible

CI/CD: Jenkins, GitLab CI/CD, GitHub Actions

Monitoring and Logging: Prometheus, Grafana, ELK Stack, CloudWatch, Datadog

Programming Languages: Python, Bash, Go

Databases: PostgreSQL, MySQL, MongoDB, DynamoDB

Version Control: Git, GitLab, GitHub

Operating Systems: Linux (CentOS, Ubuntu, Debian), macOS

Networking: TCP/IP, DNS, VPN, Load Balancing

CERTIFICATIONS

AWS Certified Solutions Architect - Professional (2021)

Kubernetes Application Developer (CKAD) (2020)

AWS Certified Developer - Associate (2019)
